## WORLD HAPPENINGS BRIEFLY TOLD

A Chinese boycott against Canadian salt fish is causing serious curtailment of trade on the Pacific coast.

Efforts to secure a preference for Canadian lumber in South Africa are being made in Ottawa by a committee in British Columbia.

A wooden chessboard was found in the ancient temple of Abu Simbel on the east of the Nile in Egypt in the hills of Doha.

Ireland is having the worst floods in 30 years because of uninterrupted rains which have inundated thousands of acres of farm land and forced many families out of their homes.

David M. Shearer, 52, died January 14, from pneumonia. He was an outstanding construction engineer and had charge of the Government elevator construction at Churchill.

Dr. Hugo Eckener, commander of the giant German dirigible, Graf Zeppelin, was awarded the 1931 medal of the International Aeronautic Federation.

A bylaw making prohibitive the sounding of locomotive whistles or clanging of their bells within the city limits between the hours of 10 p.m. and 7 a.m. has been passed by the city council of Quebec.

Sir Henry Fielding Dickens, only son of Charles Dickens, the novelist, spent his 83rd birthday at his post of common sergeant of the City of London, England, an ancient magistracy position.

The John Scott award of \$1,000 was presented jointly to Juan de la Cueva and Harold E. Pitcairn for the invention and development of the autogyro. John Scott was a chemist of Edinburgh, Scotland.

Over 50 tons of express and 34,862 pounds of mail were carried on the north route between Edmonton and Alkavik, by planes of a commercial aviation company during the season of 1931.

### War's Lessons

Canadians Have Deep Interest in Situation in Manchuria

"We have not forgotten the lesson which we learned in 1914 of what an obscure crime in a Balkan state can mean," said Hon. Vincent Massey, former Canadian Minister to Washington, in addressing the Empire Club on Manchurian problems at Toronto. "Canada needs no argument to show the situation in Manchuria is one to command her active interest."

He referred to the treaty of Washington in 1922, and the Paris peace pact, and said Canada, with the full obligation of nationhood, would have to decide for herself whether either treaty had been infringed or violated. Any trade advantage accruing to Canada through China's boycott of Japan would be more than offset by loss of trade with Japan.

### A New Explosive

Drives Bullet Five Times Faster Than Sound Travels

The modern rifle bullet has a muzzle velocity of 3,000 feet a second. It strikes a tremendous blow, measured in hundreds of pounds. Now a German named Verlich has invented an explosive that will speed the bullet more than a mile a second faster, and will triple its striking power. That is more than five times faster than sound travels.

### A Strange Farm

One of the strangest farms in the world is on Grand Canary, one of the Canary Islands, lying off Northwest Africa. The farm is the floor in the crater of an extinct volcano. Towering ramparts of rock protect it from the outer world all the way around, which ought to save stock fencing. The soil is fertile, growing all tropical fruits and vegetables, as well as potatoes, grain and feed crops.

Estimated value of the British Columbia honey crop for 1931 is placed at \$233,574. There are now 2,024 apiaries in the province, containing 21,408 hives, which last year returned 570 tons of honey. The average yield per hive was 53.5 pounds.

Alaska produced gold worth \$9,342,000 in 1931, an increase of almost a million dollars over 1930 production.

W. N. U. 1929

### Heavy Fur Catch

Catch This Year Promises To Be Best In Past Decade

The fur catch in the north country this year promises to be one of the best in the past decade. From early reports received from the fur trappers will bring down heavy shipments of furs this spring.

The quality of the furs, a factor that varies from year to year, promises to be high, north trappers claim, because of the climatic conditions that have prevailed in the sub-Arctic regions this year.

While the catch in the more civilized portions of the province will be only average, north of Churchill and in the southern Indian Lake area the catch nears the spectacular. Prices for pelts this year are only average, dealers advise, and the royalty and heavy cost of bringing them into the United States will prove a handicap to disposal this spring it is feared.

The huge Juncos' plane purchased this year by the Canadian Airways will probably bring the furs down from many of the isolated posts in the far north to Winnipeg.

### Recipes For This Week

(By Betty Barclay)

#### HAM PIE

2 cups cold cooked ham, cut in half inch cubes.  
8 potatoes.  
1 onion.  
1 green pepper.  
1/2 cup celery.  
2 tablespoons flour.  
1 teaspoon sugar.  
Salt and pepper.  
2 cups water.

Peel and slice potatoes and onion. Remove stem and seeds from pepper. Slice, chop celery. Add ham, seasonings and water to vegetables. Cook all together until vegetables are tender. Stir in flour to thicken, adding more water if needed to make enough gravy to cover. Put mixture in a baking dish. Cover with a rich biscuit dough. Bake until crust is done, about twenty minutes. Serve hot.

**LEMON CURD OR CHEESE**  
(Makes 1 pint or 8 glasses.)  
6 eggs.  
2 cups sugar.  
1/2 cup lemon juice.  
1/4 cup butter.

Beat eggs well. Add other ingredients. Cook over hot water until thick. Pour into sterilized glasses. Use for filling for tarts or cakes or as a spread for toast or hot biscuits.

### Reproach Hardly Fair

People Cannot Go Back To Conditions Of Earlier Year

Mr. J. Moore's definition of "depression"—"A period during which people never had"—is neat, but the implied reproach is hardly fair. The trouble is that you cannot turn the wheel of time backwards. As individuals, for example, may sell his motor car, or give up his telephone, or refuse to go to the cinema, but you cannot deprive the age of the motor car and the telephone and the cinema. Somehow these things are forced upon us by the movement of events; they are part of an inevitable growth, and to check them would be like stopping a river in its course—either futile or disastrous. After all, it would not really help matters to go back to the conditions of 1880 with the population of 1931.

### Insist On Remembrance

Day Being Observed

Veterans Oppose Attempts To Drop Holiday On November Eleventh

The Associated Veterans of Canada "will oppose to the uttermost" any attempt to repeal the act, which established November 11 as a public holiday, to be known as "Remembrance Day." This has been made clear to the Prime Minister, R. B. Bennett.

"The Associated Veterans view with alarm the agitation which is being carried out to secure a repeal of the act constituting November 11 a national holiday, known as 'Remembrance Day.' The memorandum says, 'They will oppose to the uttermost any attempt to secure a repeal of this legislation, and invite the support of the government in maintaining the legislation as at present enacted.'"

### A Modern Paradise

"Well, how are you getting on now you are married?"

"It is just like Paradise."

"I am glad to hear that."

"Yes, we have nothing to wear, and are in daily fear of being turned out."

It is estimated that a bushel of wheat contains 556,000 grains, a bushel of rye 888,000, and a bushel of clover 140,000.

The journey toward good times may not be sensational or rapid, but it has begun, and by helping, you can accelerate the speed.

A distinction, we note, has been speaking of a mice pie as "a polysaccharide carbohydrate of high caloric efficiency."

### A Sound Business Policy

Enough Money Should Be Spent For Advertising To Move Goods

There was an over-supply of everything. The general price level was the lowest in years. Securities deflation, unemployment and the business collapse had forced a buyers' strike. And on top of it all the California crop of citrus fruits came in 48 per cent. above that of the preceding year. Here was a hard nut for the California growers to crack but they cracked it to the king's taste.

How could they dispose of a bumper crop at a time when grain and other warehouses were already bulging with surplus crops of the previous year's harvesting? Through the medium of advertising.

They accomplished what other growers thought was impossible by developing by the means of educational and appealing advertising, a stronger appetite for oranges, lemons, grapefruit. They went out and sold their surplus and got a good price for it.

California shipped approximately 83,000 cars of citrus fruits, equivalent of half the nation's consumption of these fruits. The crop enriched the state by \$95,000,000.

Advertising must get the credit for forestalling a decline in the consumption of citrus fruits and effecting an extensive increase in that consumption at a time when national consumption in general was falling off sharply. It explains why 9,000 more cars were shipped this year than during the 1928-1929 period of peak consumption.

It is the sound business policy either in good times or bad to spend as little or as much for advertising as is necessary to move the goods with a fair margin of profit.

### Still Popular In England

Bicycle Being Widely Used As Means Of Transportation

Across the Atlantic on Albin's "light little bike" the bicycle has never lost its popularity. At the opening of the Cycle and Motorcycle Show in London, England, the last day of November, young Randolph Churchill remarked that "this industry is one in which this country has a quite unchallenged lead." Last year approximately 1,000,000 bicycles were manufactured, and as an understatement 6,000,000 "bikes" are said to be in use in the United Kingdom. Moreover, the tandem bicycle "is now coming into common use again for social touring."

The reports of the Cycle Show stress the fact that popular cyclists choose the pedal-motor in preference to the motor-propelled bicycle. This, in itself, presents a basis for reflecting upon the differences between the English temperament and our own, between the sweet, leisurely ways of English country life and our own abortive attempts at an approximation of it.

Evidently there is yet a place in the civilized world where speed is not the be-all and end-all of transportation. The Englishman or woman makes a fetish of "keeping fit," which does not altogether mean by heavy party methods. With a bicycle the individual gets out in the open, gets some exercise, observes the beauties of nature and in general bears out the philosophic truth that "to travel hopefully is better than to arrive."

### Building New Cars

An Item Of Especial Interest To Canadian Automobiles

The current issue of the Cold Storage News Letter issued by the Dominion Dairy and Cold Storage Branch, contains an item of special interest to Canadian agriculture. It says: "About five hundred new cars are being built at the present time by the Canadian railways; these cars will be especially equipped for the carriage of meat and other perishable commodities. For meat they are equipped with brine tanks, and the novel feature is that a 'refrigerator' enables the inside temperature to be read without opening the doors."

Three Men and a Wolf

An optimist is a man who, when he is told the wolf is at the door, refuses to believe a word of it and therefore upon opening his door thus unprepared is promptly gobbled up by the wolf.

A pessimist, upon learning that the wolf is at the door, believes it is so and struggles furiously, so he opens the door and gives himself up to the wolf.

An opportunist, however, learns with interest that a wolf is at his door. After studying the situation thoroughly he lures the wolf into the house and urges after a brief interval clad in a new wolfskin coat!

### Old Belief Explained

The only sense in which fish can be called a brain food is that it is digested easily and therefore the stomach does not make such a heavy call on the blood in the brain during the digestive processes.

Calendars showing maps of the world in old-fashioned style are popular in England this year.

India exported 55,000,000 pounds of tea in a recent month.

**OH! FOR THE FRESH CHARM OF SPORTS CLOTHES THAT PARIS ADORES**

Here's a delightfully smart model that is carried out in tweed-like woolen in deep bright blue mixture, now so modish.

It gives the impression of suit styling. The collar is white plique. The bindings are in navy blue. The belt is navy blue suede.

It has so much dash. It's such a splendid type for office or college wear.

Style No. 815 may be had in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

It is made of 39-inch contrasting 3/4 yard of binding and 1/2 yard of 1 1/4-inch ribbon.

Jersey is a favourite this season and adapts itself perfectly to this model.

It may also be made of cantonella crepe silk.

Price—\$25.00. Send 25 cents in stamps or cash (cash preferred). Wrap coin carefully.

### Policy Of Isolation

Dr. Nicholas Butler Criticizes the United States Attitude

"The stupidity" of the policy of national isolation was assailed at Philadelphia, Pa., by Dr. Nicholas Murray Butler, president of Columbia University, who declared the trouble with the world is that "the war is still going on."

"If this policy be pursued," he warned, "its economic and financial results will be so disastrous that present conditions will seem like an abounding prosperity."

Speaking at the annual dinner of the League of Nations Association, Dr. Butler's address climaxed a day of activity for delegates to the convention.

His plea for closer co-operation with other nations was echoed by George W. Wiersma, of New York, president of the association. Mr. Wiersma, presiding at the dinner, criticized the aloofness of the United States toward the League of Nations and declared this country is in honor bound to adhere both to the league and the world court.

Trans-Atlantic Flight

Proposed Air Hop From Ireland To New York

Captain J. P. Saul, who navigated Air Commodore Charles Kingest-Smith across the Atlantic in June, 1930, announced recently that preliminary arrangements had been made for a flight to New York and back next May.

He will be accompanied by Col. James Fitzmaurice, who preceded him across the ocean in the "Bremen" in 1928, and will start the flight from Port Marnock, Ireland. They intend to make the return hop the day after arriving in New York.

He will be accompanied by Col. James Fitzmaurice, who preceded him across the ocean in the "Bremen" in 1928, and will start the flight from Port Marnock, Ireland. They intend to make the return hop the day after arriving in New York.

FILM DIRECTOR (referring to unavailability of actor's clothes for scene supposed to take place in the Arctic): "You haven't got a fur coat, you say, but you've got your winter woollies on! I'd expect the audience to guess that—or would you like it put in the programme?"—The Humorist, London, England.

### Delightful Cruises

Conard and Anchor Line Steamers Furnish Sea Voyages For Those On Holiday Bent

That the world and his wife are going to sea for their holidays more than ever before is evident in the fact that no less than fifty-six cruises have been arranged for Conard and Anchor Line steamers during the remainder of this winter, spring, and summer. This does not include the departure this week from New York of the "Franconia" on her annual five-month cruise of the world.

The Maritimes and the St. Lawrence will get a good share of this cruise tourist business, for twelve cruises will call at Canadian ports which will form their main attraction for thousands of New Englanders expected on these short trips from New York. Last summer the "Transylvania" made three experimental voyages to Quebec and Halifax from New York with a 40-day cruise up the Saguenay River. She is the largest vessel ever to navigate this famous waterway, and on each voyage she was booked to capacity. This summer and fall there will be six such 12 1/2-day cruises, by this steamer and her sister ship the "California," which will then make her first appearance on the St. Lawrence. Other cruises in which Canadian ports will be featured are three six-day cruises from New York to Halifax and Bermuda, the express "Mauretania," during the summer. The Anchor Line "Caledonia" will make a 9-day cruise to Halifax, on August 27th, and on October 20th, a 10-day voyage will be made to the same port by the "Transylvania."

Several short summer cruises to express Commodore and two Labor Day week-end cruises by the "Transylvania" and the "Berenaria," largest Conard, are also scheduled to call at Halifax. Elaborate arrangements for being Acadia are being made for these passengers.

Short, inexpensive trips to the West Indies continue to be popular, their success being indicative of the price trends of today. A call at Miami has been introduced into the itinerary of eight-day cruises to Havana and Nassau by the "Caledonia," the visit to the Florida playgrounds of the wealthy proving a great attraction.

More leisurely visits to the West Indies will be made on three voyages of the "California," and two on the "Scythia," ranging from 12 to 22 days and visiting all the high spots in the islands as well as calls at Panama and the South American mainland.

Bermuda retains its hold on the imagination of the cruise tourist public, the "Caledonia" and "Berenaria," one of the 20,000-ton Commodore, being listed to make winter cruises from New York of 9 and 8 days respectively.

### Maintains Blood Circulation

Mechanical Heart Constructed By British Doctor Aids Science

Construction of a mechanical heart which maintains blood circulation in animals after the real heart has been removed, is announced at Stanford University, California, by Dr. Paul J. Hanzlik, head of the pharmacology.

"The device, made of brass, was perfected by a British scientist named Gibbs, Dr. Hanzlik said.

Dogs, cats, rabbits and other large animals live for several hours under an anaesthetic with the mechanical heart. Its value is in enabling students and physicians to trace the flow of blood through an animal's body and to study the effects of various drugs and dyes in the blood, Dr. Hanzlik explained.

**Trans-Atlantic Flight**

Proposed Air Hop From Ireland To New York

Captain J. P. Saul, who navigated Air Commodore Charles Kingest-Smith across the Atlantic in June, 1930, announced recently that preliminary arrangements had been made for a flight to New York and back next May.

### Cheese Is Winter Food

Used In Larger Amounts During Winter Months When Body Requires Extra Heat

The Milk Utilization Service of the Dominion Dairy and Cold Storage Branch has prepared the following item with respect to the value of cheese as winter food: "Cheese is an 'all-year-round' food but it is used in larger amounts during the winter months when the body requires extra heat, much more than obtained from the food consumed."

"Cheese is a valuable protein, an important source of calcium, and because of the high fat content, it is a splendid energy-producer. In cooking this food, a low temperature and a short length of time should be used in order to avoid toughening the protein."

### This Independence

A farm laborer in England who had been out of work for many months and had been living on the dole, remarked to his physician one day: "Doctor, do you know I had an offer to work some days ago which would have given me five shillings more a week than I am getting from the dole, but after thinking it over carefully, I preferred to remain independent."

One of the most interesting trips to be taken by a traveller in Vienna is a two-hour aerial tramway trip which carries passengers over the Alps.

A doctor declares that there is only one sensible thing to take when one is run down. The number of the car.

### Lost Money

Dead Accounts In Canadian Banks Reach Huge Total

In Winnipeg banks today there is more than \$100,000 of "lost" money, belonging to Winnipeg citizens. More than 2,000 citizens or their heirs, possess money which they either have forgotten about or which, although their own, they know nothing about.

This is true because the annual statements made to parliament by the Canadian chartered banks show upward of 2,000 bank accounts at Winnipeg which have not been touched for many years, and in no case for less than five years. In most cases the banks long ago ceased to credit these accounts with interest. They are "dead" accounts and unless claimed by the rightful owners may go on in the possession of the banks for ever. Parliament, of course, knows about the "lost" money, but parliament by law has declined to take any action which might prevent owners from resuming proprietorship of their money.

As long as these banks stay in business, so long will the accounts be recorded and the balances held ready for payment. If a holder is wound up or becomes bankrupt, parliament, under the Bank Act, steps in and takes these deposits into the national treasury, where they are held for all time to the credit of the owner, his heirs and successors. Upon proof of ownership, the holder may receive interest at 3 per cent. per annum must be paid. The banks, of course, pay principal and interest also, upon proof of ownership.

The number and amounts of these "lost" accounts total \$2,077,000, and the number numbered 50,000. In hundreds of the Winnipeg cases the owners must still be alive, probably in the city. They have forgotten their deposits. In other cases, the owners are dead and the heirs are unaware of the bank accounts.

### Evolution Of The Desk

Was Crude Box In Time Of Early Stuarts

In their present form, desks owe their popularity to the decision of the early Stuart aristocrats that it no longer was sufficient for a gentleman to write his own letters. Previously such missives had been entirely composed and entirely dictated by itinerant scribes who made their way about the countryside with an inkhorn slung over one shoulder and a quiver of quills ready for use.

The desk, in its present state of development, bears great fidelity to its original form than any other article of furniture. It is the direct offspring of the ancient Bible box which was used during the sixteenth century as a repository for the family Bible and as a lectern upon which to rest it during family prayers. When the young blood of the Stuart times finally decided to commit his own writing sentiments direct to paper and not to the art of using a pen, he naturally cast about for some place in which to keep his writing materials, and the Bible box was the answer.

The next move was quick and inevitable. The Bible box was mounted on legs and became an article of furniture. Gradually small boxes were added to the interior as a first aid to order. Drawers were placed below to provide additional storage space and the turned legs and under-frames were somewhat refined. As the age of magnificent furniture approached the craftsmen bestowed more and more attention upon the desk. The crude box on a stand evolved into a graceful and highly ornamental object, but its outline remains.

**Cheese Is Winter Food**

Used In Larger Amounts During Winter Months When Body Requires Extra Heat

The Milk Utilization Service of the Dominion Dairy and Cold Storage Branch has prepared the following item with respect to the value of cheese as winter food: "Cheese is an 'all-year-round' food but it is used in larger amounts during the winter months when the body requires extra heat, much more than obtained from the food consumed."

"Cheese is a valuable protein, an important source of calcium, and because of the high fat content, it is a splendid energy-producer. In cooking this food, a low temperature and a short length of time should be used in order to avoid toughening the protein."

### Had Melancholy Blues

Wanted to die... felt so blue and wretched Don't let crime ruin your good time. Lydia E. Pinkham's Vegetable Compound gives you relief.

**To Assist Agriculture**

Quota System Between Canada and Great Britain For Canadian Wheat

Establishment of a quota system between Canada and Great Britain, for Canadian wheat, was visualized as one of the proposed steps for Saskatchewan agriculture in 1932 by J. D. MacFarlane, president of the Saskatchewan Agricultural Societies Association, who presented his annual report to an executive meeting of that association at the University of Saskatchewan.

Mr. MacFarlane also said a change in the styles of obtaining credit by the countries of the world was essential to economic recovery, and he believed cancellation of war debts, to enable world buying power to improve, was necessary if 1932 was to be a better year than the past year.

Even adoption of these changes did not offer much hope for the present year, Mr. MacFarlane believed, but he thought they would tend to make next year more normal and would result in agriculture to a place more nearly approaching its old position.

Dispensing of the high rate of interest paid by one country to another would materially assist, he thought. He believed an international banking committee could render help in the situation, functioning similarly to the League of Nations, but dealing with the financial obligations and requirements of the countries of the world.

Each country, under this system, would issue its own currency, instead of borrowing in New York or London, England.

### Cleaning Units Needed

To Ensure Distribution Of Clean Seed To Farmers

In order to cope with the cleaning of seed grain for distribution to needy farmers this spring between 400 and 500 travelling seed cleaning machines will probably be necessary.

In addition to this, it is believed by grain men that every privately owned seed cleaning machine will have to be utilized if seed grain is to be properly cleaned in preparation for coming spring work.

Over 6,000,000 bushels of seed wheat and at least 2,000,000 bushels of seed oats will be required for distribution before spring, entailing an expenditure of approximately \$8,000,000.

According to C. B. Daniel, manager of the Saskatchewan Relief Commission, the seed grain relief plan in Saskatchewan is a gigantic problem and it is essential that a plan be put into effect as soon as possible.

Definite steps toward adopting a scheme whereby clean seed can be supplied to the farmers of Saskatchewan through the Saskatchewan Relief Commission are being formulated, it is learned unofficially, Thursday, Jan. 14.

## CHAPTER XI—Continued.

Jean, glancing enquiringly across at Mrs. Craig, was startled at the sudden change in her face produced by Lady Anne's simple announcement. The pale skin seemed to pale, most wistful, and a cut flower that needs water, and the lips that had been parted in a smile stiffened slowly into their accustomed straight line.

"Of course," Mrs. Craig's voice sounded flat and she swallowed once or twice before she spoke—"that must be your father."

"I knew your father," Mrs. Peterson.

To Jean, always sensitive to the emotional quality of the atmosphere, it seemed as though some current of hostility, of malevolence, leapt at her through the innocent-sounding speech. "I knew your father," it was quite ridiculous, of course, but the words sounded almost like a threat.

She had no answer ready, and a brief silence followed. Then Lady Anne bridged the awkward moment with some commonplace, smoothly steering the conversation into smoother waters, and a few minutes later Mrs. Craig rose to go.

"I'll see you across the park, Judith," volunteered Nick, and he and his mother accompanied her out of the room.

In the hall, Lady Anne detained her visitor on a instant with a light hand on her arm, while Nick foraged for his own particular headgear amongst the family assortment of hats and caps.

"Jean is a dear girl, Judith," she said earnestly, "I want you to be friends with her. Don't—pleadingly—visit the sins of the fathers on the children."

"Why, no, I shouldn't," replied Mrs. Craig, with apparent frankness. "It was only that, for the moment, it was rather a shock to learn that she was—that woman's—child."

"Of course it was," acquiesced Lady Anne. "Goodbye, dear Judith."

But notwithstanding Mrs. Craig's assurances, a troubled look lingered in Lady Anne's grey eyes long after her guest's departure.

## CHAPTER XII

## A Sense Of Duty

Jean was immensely puzzled at the abrupt change which had occurred in Mrs. Craig's manner immediately upon hearing that she was the daughter of Glyn Peterson, and, as soon as the visitor had taken her departure, she sought an explanation.

"What on earth made Mrs. Craig freeze up the instant my father's name was mentioned? Did she hate him for any reason?"

Tormarin looked across at her.

"No," he answered quietly, "she tried to hate him. She loved him."

Jean stared at him in frank astonishment. She had never dreamed that there had been any other woman than Jacqueline in Glyn's life.

"Mrs. Craig—and my father?" she exclaimed incredulously.

"She wasn't Mrs. Craig in those days," she was Judith Burke."

"Well, but," persisted Jean, determined to get to the bottom of the mystery. "I still don't see why."

"Why what?"—unwillingly.

"Why she looked as if she loathed the very sight of me. That's not—drily—"quite the effect you would expect love to produce!"

"There was a curiously abstracted look in Tormarin's eyes as he made answer."

"Love is productive of very curious effects on occasion. More particularly when it is without hope of fulfilment," he added in a lower tone.

"Well, I suppose my father couldn't help not falling in love with Mrs. Craig," protested Jean with some warmth. "Nor could he have prevented her caring for him. And it's certainly illogical of her to feel any resentment towards me on that score. I had nothing to do with it."

"Love and logic have precious little to say to each other, as a rule," replied Tormarin grimly. "To Judith, you're the child of the woman who stole her lover away from her, so you can hardly expect her to feel an over-whelming affection for you."

"The woman who stole her lover away from her?" repeated Jean slowly. "I don't understand. What do you mean, Elaine?"

He glanced at her in some surprise. "Surely—Don't you know the circumstances?"

She shook her head.

"No, I simply don't know in the least what you are talking about. Please tell me."

Tormarin made no response for a moment. He was standing with his back to the light, but as he lit a cigarette the flame of the match revealed a worded expression on his face, as though he deprecated the turn the conversation was taking.

"Oh, well," he said at last, evading the point at issue. "It's all ancient history now. Let it go. There's never anything gained by digging up the dry bones of the past."

Jean's mouth set itself in a mutinous line of determination.

"Please tell me, Elaine," she reiterated. "As it is something which concerns my father and a woman I shall probably be meeting fairly often in the future, I think I have a right to know about it."

He shrugged his shoulders resignedly.

"Very well—if you insist. But I don't think you'll be any happier for knowing." He paused. "Still inextinguishable?"

She bent her head.

"Quite"—firmly—"whatever it is, I'd rather know it."

"On your own head be it, then."

He seemed trying to infuse a lighter element into the conversation, as though hoping to minimise the effect of what he had to tell her. "It was just like this—that your father and Judith Burke were engaged to be married at the time he met your mother, and that—well, to make a long story short, he ran away with Miss Mayvory on the day fixed for his wedding with Judith."

A dead silence followed the disclosure. Then Jean uttered a low cry of dismay.

"My father did that? Are you sure?"

"Quite sure."

Tormarin could see that the story had distressed her. Her eyes showed hurt and bewilderment like those of a child who has met with a totally unexpected rebuff.

"Don't take it like that!" he urged hastily. "After all, it was nothing so terrible. You look as though he had broken every one of the ten commandments"—smiling.

Jean smiled back rather wanly.

"I don't know that I should worry very much if he had—in some circumstances. But—don't you see?—it was so cruel, so horribly selfish!"

"You've got to remember two things in justification."

"Justification?"—expressively.

"There wasn't any. There couldn't be."

"Well, excuse, then, if you like. One thing is that Jacqueline Mayvory was one of the most beautiful of women, and the other, that your father's engagement to Judith had really been more or less engineered by her respective parents—adjoining properties, friends of long standing, and so on. It was no love-match—on his side."

"But on her wedding-day"—pitifully. "Oh! Poor Judith!"

Tormarin smiled a trifle cynically. "That was the root of the trouble. It was Judith's pride that was hurt—as well as her heart. She married Major Craig not long after, and I believe they were really fond of one another and comparatively happy. But she has never forgiven Peterson from that day to this. And you, being Jacqueline Mayvory's daughter, will come in for the residue of her bitterness. Understand?"—ironically—"you can make friends with her."

"I shall try to," said Jean simply. "Is Major Craig living now?"

"No. He died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

"No," he answered quietly, "she tried to hate him. She loved him."

Jean stared at him in frank astonishment. She had never dreamed that there had been any other woman than Jacqueline in Glyn's life.

"Mrs. Craig—and my father?" she exclaimed incredulously.

"She wasn't Mrs. Craig in those days," she was Judith Burke."

"Well, but," persisted Jean, determined to get to the bottom of the mystery. "I still don't see why."

"Why what?"—unwillingly.

"Why she looked as if she loathed the very sight of me. That's not—drily—"quite the effect you would expect love to produce!"

"There was a curiously abstracted look in Tormarin's eyes as he made answer."

"Love is productive of very curious effects on occasion. More particularly when it is without hope of fulfilment," he added in a lower tone.

"Well, I suppose my father couldn't help not falling in love with Mrs. Craig," protested Jean with some warmth. "Nor could he have prevented her caring for him. And it's certainly illogical of her to feel any resentment towards me on that score. I had nothing to do with it."

"Love and logic have precious little to say to each other, as a rule," replied Tormarin grimly. "To Judith, you're the child of the woman who stole her lover away from her, so you can hardly expect her to feel an over-whelming affection for you."

"The woman who stole her lover away from her?" repeated Jean slowly. "I don't understand. What do you mean, Elaine?"

He glanced at her in some surprise. "Surely—Don't you know the circumstances?"

She shook her head.

"No, I simply don't know in the least what you are talking about. Please tell me."

Tormarin made no response for a moment. He was standing with his back to the light, but as he lit a cigarette the flame of the match revealed a worded expression on his face, as though he deprecated the turn the conversation was taking.

"Oh, well," he said at last, evading the point at issue. "It's all ancient history now. Let it go. There's never anything gained by digging up the dry bones of the past."

Jean's mouth set itself in a mutinous line of determination.

"Please tell me, Elaine," she reiterated. "As it is something which concerns my father and a woman I shall probably be meeting fairly often in the future, I think I have a right to know about it."

He shrugged his shoulders resignedly.

She bent her head.

"Quite"—firmly—"whatever it is, I'd rather know it."

"On your own head be it, then."

He seemed trying to infuse a lighter element into the conversation, as though hoping to minimise the effect of what he had to tell her. "It was just like this—that your father and Judith Burke were engaged to be married at the time he met your mother, and that—well, to make a long story short, he ran away with Miss Mayvory on the day fixed for his wedding with Judith."

A dead silence followed the disclosure. Then Jean uttered a low cry of dismay.

"My father did that? Are you sure?"

"Quite sure."

Tormarin could see that the story had distressed her. Her eyes showed hurt and bewilderment like those of a child who has met with a totally unexpected rebuff.

"Don't take it like that!" he urged hastily. "After all, it was nothing so terrible. You look as though he had broken every one of the ten commandments"—smiling.

Jean smiled back rather wanly.

"I don't know that I should worry very much if he had—in some circumstances. But—don't you see?—it was so cruel, so horribly selfish!"

"You've got to remember two things in justification."

"Justification?"—expressively.

"There wasn't any. There couldn't be."

"Well, excuse, then, if you like. One thing is that Jacqueline Mayvory was one of the most beautiful of women, and the other, that your father's engagement to Judith had really been more or less engineered by her respective parents—adjoining properties, friends of long standing, and so on. It was no love-match—on his side."

"But on her wedding-day"—pitifully. "Oh! Poor Judith!"

Tormarin smiled a trifle cynically. "That was the root of the trouble. It was Judith's pride that was hurt—as well as her heart. She married Major Craig not long after, and I believe they were really fond of one another and comparatively happy. But she has never forgiven Peterson from that day to this. And you, being Jacqueline Mayvory's daughter, will come in for the residue of her bitterness. Understand?"—ironically—"you can make friends with her."

"I shall try to," said Jean simply. "Is Major Craig living now?"

"No. He died out in India, and after his death Judith came back to England. She has lived at Willow Ferry with her brother, Geoffrey Burke, ever since."

There was a long silence, while Jean tried to fit in the new facts she had learned with her knowledge of her father's character. She was a little afraid that Tormarin might misunderstand her impulsive outburst of indignation.

"Don't think that I am sitting in judgment on my father," she said at last. "In a way, I can—even understand his doing such a thing. You know, for the last two years he has been the life of my mother both constantly, and anyone living with them could understand their doing all kinds of things that ordinary people wouldn't do."

She paused, as though seeking words that might make her meaning clearer. "They would never really mean to hurt anyone, but they were just like a couple of children together—gloriously irresponsible and happy. I always felt years older than either of them. Glyn used to say I was 'tired' with a dramatic sense of duty"—laughing rather ruefully. "I suppose I am. Probably I inherit it from our old Puritan ancestors on the Peterson side. I know I couldn't have cheerfully run off and taken my happiness at the cost of someone else's prior right."

A look of extreme bitterness crossed Tormarin's face.

(To Be Continued.)

## Britain In Times Of Trouble

## In Days Of Adversity Mother Of Nations Has A Secret Vigor

A valued correspondent sends us privately an extract from a valuable issue of *Wesley's Magazine* written about England in 1856. His words were marked by such sympathetic insight and are so apposite to the bearing of Englishmen today in the midst of great difficulties, that it is worth while to reprint them.

"I see her not dispirited, not weak, but well remembering that she has seen dark days before; indeed with a kind of instinct that she sees a little better in a cloudy day, and that in a storm of battle and calamity she has a secret vigor and a pulse like a cannon. I see her in her old age, not decrepit, but young and still daring to believe in her power of endurance and expansion. Seeing this, I say, 'All hail!' mother of nations, mother of heroes, with strength still equal to the times, still able to enter into the swift to execute the policy which the mind and heart of mankind require at the present hour and thus only hospitable to the foreigner and truly a home to the thoughtful and generous who are born in the soil."

## Stones From Buckingham Palace

## Disused Pavement Being Incorporated In Building At Hillingdon

Americans have acquired from England very many treasures of stone, of marble, and of bronzework, but they have neglected the old paving stones of the disused paving stones from Buckingham Palace, reports the Overseas Daily Mail. These stones, which have been trodden by Kings and Queens, were removed some months ago from passages in the Palace and taken to a public auction and courtyard.

It is stated that keen American bidders desired to take them to the United States as relics. A British firm of builders has retained them for use in a building scheme at Hillingdon, Middlesex. Inscribed "Buckingham Palace, Paving 1670-1930," they are being inserted in centres of blocks of new houses, and a covenant is inserted in the conveyance to each purchaser of the houses that the stones form part of the freehold and may not be removed, or damaged. The stones, which were scarcely any wear, were laid down by the Duke of Buckingham when he built the original house in 1670.

## Regulations For Chinese

## New Order Permits Four Years' Visit To China

All persons of Chinese origin returning to China between now and December 1, 1932, will be permitted to delay their return to Canada for a period of four years, according to new regulations formed by Dominion order-in-council and forwarded from Ottawa. Hereafter the immigration law: have required that all Chinese visiting their homeland return to this country within two years under penalty of being refused admittance.

## Employment Higher

Employment in Canada during 1931, says a report of the Dominion Bureau of Statistics, was generally higher than for the six-year period 1921 to 1926, although lower than in the last four years. Returns made to the Bureau showed a monthly average of 927,485 workers during 1931. With 1928 taken as 100, the following index numbers were compared: 1931, 102.5; 1930, 113.4; 1929, 119; 1928, 111.6; 1927, 104.6; and 1921, 88.8.

The world's oldest intact book is said to be a volume discovered from China recently. It is composed of 78 wooden leaves fixed together with string, and dates back to 100 B.C.

## The Wise Prove, and the Foolish Confess, by their conduct, that a life of employment is the only life worth leading.—Paley.

An Eskimo hunter can kill a bear with nothing more than a thin rope attached to a chunk of ice.

## COULDN'T COMB HAIR

## Crippled by Rheumatism

"I had been suffering with rheumatism for about 3 years when this time last year was laid up for 10 weeks. My hands and arms and knees were so much affected, I could not get about at all. I could not wash my face or comb my hair. All this had to be done for me. At the beginning of this year I started taking Kruschen Salts every morning and I am pleased to say I am quite well now and able to see to my home and can go out in all kinds of weather without an affecting pain."

Rheumatism is associated with an excess of uric acid in the system. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid and its removal from the blood and pave the way to ill-health.

## Search For Abandoned Ship

## Alaskan Aviator Hopes To Salvage Lost Treasure Of Furs

A lost treasure of furs, valued at \$150,000, is reward sought by William R. Graham, Alaska flyer, en route to the frozen north. Graham said he will use his specially constructed "plane" in a search for the treasure. "Baychik" which is frozen fast in the Arctic ice somewhere south of Point Barrow.

The flyer said the ship was abandoned by the Hudson's Bay Fur Company when it became icebound, and he intends to exercise salvage rights if he can find it.

The ice packs are said to have shifted the position of the ship considerably since it was deserted last October. Graham believes the vessel must now be covered with snow. To get to the ship, the complication, observation will be difficult in the half light of the Arctic.

Graham will make Walnwright, Alaska, his base for the flight. Before flying operations start he will attempt to calculate the drift of the ice packs.

The flyer recently received a contract to carry mail between Nome and Unalakleet. He has flown in Alaska since 1929.

## Stop Work On Giant 'Plane'

## Reported That 35-Ton Commercial Flying Boat May Not Be Completed

Announcement has been made that work has been stopped on the giant six-engined 35-ton commercial flying boat being built at the order of the Civil Department of the Air Ministry, says the New York Times in a special cable from London.

It is understood the ship, which was being built at the supermarine works of the Vickers Ltd., Southampton, for trans-Atlantic service, and was designed to eclipse the Dornier DO-X in size and speed, will never be completed, as negotiations are proceeding with a view to cancelling the contract on the ground of economy, the Times cable says.

## Britain and War Debts

So far as this country is concerned there is certainly a widespread belief that general cancellation of reparations and war debts would facilitate economic recovery and, therefore, be generally beneficial; but the British taxpayer would not lightly entertain the idea of cancelling reparations while retaining the burden imposed by war debts.—London Times, England.

## Another lesson learned in adversity

is that a tire isn't the only thing you can patch.

There are over 500 telegraph boys in the London postal area alone.

## BABY

## FRETFUL, RESTLESS?

Look to this cause

When your baby fusses, tosses and seems unable to sleep restfully, look for one common cause, doctor say. Constipation. To get rid quickly of the accumulated waste which causes restlessness and discomfort, give a cleansing dose of Castoria. Castoria, you know, is made specially for children's delicate needs. It is a pure vegetable preparation, contains no drugs, is non-harmful, and is mild and gentle you can give it to a young infant to relieve colic. Yet it is a powerful laxative for older children. Castoria's regulative help will bring relaxed comfort and restful sleep to your baby. Keep a bottle on hand. Genuine Castoria always has the name: *Dr. J. C. Ayer & Co.*

## Some Facts About Water

## Science Discloses How Essential It Is To Plant Life

Everyone knows that water is essential to the proper growth and development of all plant life. Here is some indication of its magnitude as disclosed by science:

A sunflower with a combined leaf area of 15 square yards will evaporate some 75 quarts of water from its leaves during growth.

An acre of cabbage requires over 2,000,000 quarts of water in a season. Some of the hardwood tree species give off as much as 80 quarts of water per day by evaporation.

It takes over 600 pounds of water to produce one pound of dry alfalfa. Over 98 per cent. of energy absorbed by plants from the sun is utilized in the evaporation of water from all surfaces. Along this line studies conducted by experts of the Federal Department of Agriculture show that:

It takes nearly 1,700 quarts of water to produce one pound of wheat, 1,425 quarts of water to produce one pound of oats.

## Prairie Thoroughbred Breeders

## Officers Elected At Meeting Of Association Held In Winnipeg

J. W. Sifton, Winnipeg, was re-elected president of the Prairie Thoroughbred Breeders' and Racing Association at its annual meeting in Winnipeg. A. E. Cross, Calgary, Alberta, and J. E. Lunney, Regina, Sask., were elected vice-presidents.

Excellent progress was reported by James Speers, honorary secretary of the association. The number of western Canadian bred horses attending the racing meets had more than trebled during the seven years of the organization's existence, he said.

## Soviet gasoline having reached America, the cars will be Russian around more than ever.—Toronto Star.

## Uniform Monetary System

## Proposed That Effective Measure Be Taken By The British Empire

A memorandum strongly advocating the introduction of a uniform monetary system for the British Commonwealth of Nations was adopted by the Federated Chambers of Commerce of the British Empire.

The memorandum declares since most empire countries are now off the gold standard the struggle to attract and retain gold has ceased. But in order to remain competitive in the world's markets, the nations are obliged to force down prices by currency contraction which has led to similar contractions by other nations, neutralizing the first advantage and depressing prices below the cost of production.

This, the memorandum says, has reduced the purchasing-power of 91 per cent. of the world's population. So-called over-production, it continues, is really under-consumption, owing to restricted purchasing power. No one nation can prevent this deflation, the memorandum contends, and the only group strong enough to take effective measures is the British Empire, within which members would insist themselves from external competition while re-expanding their currencies, action which would make possible the establishment of sane co-operation.

## THE RHYMING OPTIMIST

## By Aline Michaels

## GOLDEN HARMONIES

There is music which brings a message More sweet than the call of the flute, A word that echoes within the soul Long after the viols are mute. It hints of melodies rarer Than the master ever wrote, And it leaves a gladness that lingers on, Throbbing after the final note.

There are poems which open vistas Of pleasure to charm the gaze, And lead the thought into splendid spheres Too bright for a word's weak praise. They beckon the laggard fancy And they give to the heart the boundless joy That comes with a dream possessed.

Oh, weavers of words which quicken the story within the breast, Oh, makers of golden harmonies Never fully in song expressed, We, who hunger and thirst for the beauty Not shaped in an earthly mold, Give you thanks for the music none can write.

And the wonder no lines have told! In all infantile complaints that are the result of the deprivations of worms in the system, Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot make its strength or thrive. These powders mean health and improvement.

It is difficult to understand the objections raised by some farmers to placing light on a wagon. There is no warrant for the assumption that a suitable lamp would cost more than a dollar or two. It is doubtful if even a farmer who owned half a dozen wagons would have to spend more than five or six dollars to equip all of them for light.

It is usually the end of it. Many new bus services are being started in Spain.

Aspirin was meant for just such times, for it insures your comfort. Freedom from those pains that nag at nerves and wear you down. One tablet will block that threatening headache while it is still just a threat. Take two or three tablets when you've caught a cold, and that's usually the end of it.

Carry Aspirin tablets when you travel. Have some at the office. Like an efficient secretary, they will often "save the day" and spare you many uncomfortable, unproductive hours. Aspirin is harmless, to keep it handy, keep it in mind, and use it. No man of affairs can afford to ignore the score and more of uses explained in the proven directions. From a grumbling loach to those rheumatic pains which seem almost to bend the bones, Aspirin tablets are ready with quick relief—and always work. Neuritis. Numbness. Any nagging, needless pain.

Get the genuine tablets, stamped with the Bayer cross. They are of perfect purity, absolute uniformity, and have the same action every time. Why experiment with imitations costing a few cents less? The saving is too little. There is too much at stake. But there is economy in the purchase of genuine Aspirin tablets in the large bottles.

Made in Canada

**EDWIN H. JONES, M.C.,  
MAYOR FOR 1932**

The election on Monday for the Mayorship of Lacombe drew out a very good number of electors, in fact one of the heaviest votes ever polled here. The result, however, was as expected, Mr. Jones securing a majority of 115 over his opponent. Mr. Hootson's native modesty prevented him no doubt, from enumerating many of the improvements in Lacombe for which he was responsible, in his address to the electors, but from the number he did set out, apparently there would have been no Lacombe without him and we should be thankful. The electors however thought that a one man council was not needed any longer in Lacombe, now that the big things had already been put through by Mr. Hootson, and decided to let a new man carry on the good work, with the aid of a good council.

With the exception of one councillor yet to be elected, the new council is composed of Mayor, Edwin H. Jones; Councillors, P. C. Owen, B. S. Cameron, Hal D. Laird, Wilbert Avery, Thos. Wilkes, and we think that Lacombe is quite safe in their hands.

**DEATH OF C. C. WOLFE**

We have this week received word of the death of one of our old time farmers, Mr. C. C. Wolfe, which occurred at the home of his daughter, Mrs. Platt, at Ferndale, Wash. Deceased farmed for many years in this district, retiring a few years ago and going to Washington. He is survived by two daughters, Mrs. Elmer, of Jacksonville, Fla., and Mrs. Platt, of Ferndale, Wash. Also three sons, Arthur, of Lacombe; Hugh, of Wetaakwin, and George, of Los Angeles, Cal. The sympathy of the district is extended to the bereaved family.

**ST. ANDREW'S NOTES**

The Mission Band will meet immediately after Sunday School on Sunday, Feb. 21st.

The regular meeting of the Women's Missionary Society of St. Andrew's Church will be held at the home of Mrs. S. Pillman on Tuesday, Feb. 16th at 3:00 p.m.

The Young Women's Auxiliary will hold their regular monthly meeting at the Manse on Tuesday evening, Feb. 16th.

World's Day of Prayer will be observed on Friday, Feb. 12th, in St. Andrew's United Church at 3:00 p.m. This is a combined service of members of the various church in Lacombe and all women are welcome. The three groups of C.G.I.T. girls will hold a tea during the afternoon and serve supper from 5:00 to 7:30 on Saturday, Feb. 13th. As the girls are making this effort toward their annual financial campaign in aid of Young People's Work, it is hoped they will receive generous support.

A motion also carried to hold a tea and sale of baking on Saturday, February 20th.

**AT THE AVALON THEATRE**

This "Daddy Long Legs" She had always pictured him old, bald, feeble and kind, her dear "Daddy Long Legs", the Benefactor she had never seen. Then she opened the door—the door to his study—and it was Jack Gwynn's best role, the orphan waif of "Daddy Long Legs", a role which gives full play to the wistful charm, the dramatic emotions and the lovable personality of the sweetheart of the screen.

And with Miss Gwynn in this delightful picture is Warner Baxter, more distinguished and dashing than ever, Una Merkel, John Arledge, Claude Gillingwater, Sr. and Kathryn Williams, among others, under the direction of Alfred Santell.

COMING  
Ramon Navarro in "Son of India," Feb. 18, 19 and 20.  
Ronald Coleman in "Devil to Pay," Feb. 25, 26 and 27.

**BLACKFALDS NEWS**

At the annual meeting of the Village council, last week, Mr. F. H. Pay was elected Mayor, Mr. J. V. N. Miller, Secretary and Jesse Fraser Auditor. Mr. J. H. Martin was re-elected councillor at the Annual meeting of the village.

Dr. Little held a clinic at the home of Mr. P. McLennan on Tuesday afternoon. It was a very successful clinic, twenty five babies and young children being examined.

Rev. H. D. Riggs, Blackfalds, Alberta

Dear Sir: I wish to thank you on behalf of the Lomond Community Club ladies for your kind donations of vegetables which we received and were greatly appreciated by us.

Sincerely yours,  
Mrs. Cecil R. Lawson,  
Secretary-Treasurer

**TO THE RATEPAYERS AND  
ELECTORS OF THE TOWN  
OF LACOMBE**

Ladies and Gentlemen, I wish to convey to you my appreciation and thanks for the honour you have conferred upon me by electing me Mayor of the Town for 1932.

I hope that I may during my term of office justify your confidence in me and I assure you that I wish to do all in my power to fulfill the onerous duties of the office.

I wish especially to thank those Ladies and Gentlemen who worked so zealously on my behalf and also thank those who so kindly donated the use of their homes for conveying the voters to the poll.

Yours faithfully,  
EDWIN H. JONES

**AUTO OWNERS NOTICE**

If you have not secured your 1932 Automobile License, do not drive your Auto after today.

**BEAN SUPPER**

Don't miss the Bean Supper and programme in Lacombe School, on Monday evening, Feb. 15th. Supper at 6.30. Admission 50c.; Children 15c.

Have you seen the \$1500.00 Electric Welding Machine at Laird Motor Garage. You are invited to go in and inspect it.

**JOHN IMRIE TO ADDRESS  
BOARD OF TRADE**

On Wednesday evening, February 24, at 6:30 o'clock The Lacombe and District Board of Trade and Lacombe Agricultural Society are holding Joint Banquet in the United Church Hall, Alberta Street, to those who have brought honor to our district. This is an annual event and should be patronized by every one of the town and immediate district.

Mr. John Imrie, Managing Director of the Edmonton Journal has been secured as Special Speaker.

Mr. Imrie will speak on one or other of the following subjects: Trade Prospects in Japan and China, The Crisis in Manchuria; Hudson Bay and Manitoba's Northland. Having lately visited these places, Mr. Imrie can speak first hand.

Other visitors will be H. A. Craig, Deputy Minister on Department of Agriculture, Hon. Mrs. Fairbairn, Members of Education, Chamber of Commerce and other Boards of Trade and C.P.R. Officials. The ladies are putting on a Turkey Dinner and Tickets are only 50c.

**THE CHURCH OF ENGLAND  
IN CANADA**

**MUNICIPAL DISTRICT OF  
THE CROWN NO. 399**

To the CROWN and Members of the Council—  
Gentlemen:

Having acted as Weed Inspector for your Municipal District for the year 1931, I beg to submit the following report for your consideration. The weeds in the district, which existed during the spring of 1931, which greatly hindered the crop growth during the month of May and the first two weeks of the month of June, I did not start work until the middle of the month of June. I followed as closely as possible the same procedure as in the previous year, laying special stress on Sow Thistle and Canada Thistle.

The first point I would like to mention is the co-operation of the farmers as a whole throughout the M.D. to control those two weeds. In every part of the district I was given valuable assistance in seeing that weeds were attended to and the ratepayers as a whole are not interested in the weeds on the own farms, but also in the weeds on adjoining lands.

Sow Thistle has not increased in the M.D. and is being looked after and in a good many cases, eradicated. The most effective method of handling when it first appears is to dig the first few plants up. Chemical has not been a success and the farmers as a whole are relying on cultivation as a means of eradication.

Canada Thistle has a foothold on almost every farm in the M.D. to a greater or lesser extent. The patches are as a rule being well attended to and an increasing number of farmers have pinned their faith to cultivation as a means to eradicate it. Cutting it at the flowering period and leaving the ground blank until, just before freeze-up and plowing again, leaving the ground rough for the winter has given the best results and in almost every instance has killed it out completely where the work was properly done.

We have had splendid assistance from the department of Agriculture and in the case of lakes owned by the Government we have assistance up to fifty per cent. of the cost of taking care of Sow Thistle along the shores. Under this heading we took care of Gill Lake and Lacombe Lake. The amount expended was in the neighborhood of \$50.00.

The residents have reported more freely to your Secretary any grievances in regard to weeds. As a very helpful sign, and in every case they were attended to immediately.

I was asked to make special inspections of several farms at threatening time to examine shocks. In several cases I ordered shocks destroyed, but not in large numbers. As a rule I found only a very small number of shocks containing thistles.

I instructed threshermen in every inspection not to thresh any bundles containing Canada or Sow Thistle. I also asked every threshman how the situation compared with last year in regard to Canada Thistle. In almost every instance the answer was that they had had very few thistles brought to the machine this year. They did not say they were any less, but were satisfied that the farmers were making a greater effort to see that they did not go to seed. I have seen as high as five fires in fields in one day burning the odd shocks that contained thistles, which is in my estimation, an excellent sign that the farmers are making a more determined effort to control them. I have been told that if the same care had been taken five years ago there would not be so much trouble today.

I have written official notices to twenty-nine parties to destroy weeds. In five instances I had to have farmers brought before a J.P., to get my orders carried out. In every case parties were fined Five Dollars and costs for not attending to the order issued and were given forty-eight hours to fulfill the same, with instructions not to thresh any bundles containing Canada or Sow Thistle.

In one case the J.P. and Mr. Reid of the Experimental Farm made inspection to see if I had been too harsh and they increased the order. In one other case Mr. Pepper, Govt. Supervisor made an inspection and came back to make a second inspection to see that his orders were fulfilled. One farmer reported to the Department that I had not done my duty and they sent Mr. Pepper to make an inspection. He paid everything satisfactory.

The greatest amount of complaint about thistle is directed to the patches on the road allowances.

One year ago I read that the Council had to look after the road allowance. This year that was changed and the farmer was made

## How a Rolling Stone Came To Rest in Central Alberta

From the Country Guide of February 1932. Written by H. H. McInnes.

Calgary is the capital of Canada's cattle ranching country. Many a herd, some large and some small, some prime and others not so good, has been driven through the streets, coming from somewhere and headed for somewhere else, each with a reason of its own. One of these herds was a little different. It was made up of a number of registered Shorthorn cattle only. It was headed north for reasons we shall come to later, and behind it rode a clean-cut young rancher with a good stiff jaw and eyes that were keen and could twinkle too.

Without ceremony he was promptly halted by an officer of the R. N. W. M. P. to whom it had been reported that these cattle had manged. As a rule there are just two reactions to the suggestion that a rancher's cattle have manged, depending upon whether or not he agrees with you. If not, he unhears a vocabulary that has never appeared in print which he uses with the same dexterity and precision that he throws a lariat and leaves you speechless. Otherwise, he just goes quiet and takes it out in nightmares.

The rancher, although he knew there was no mangle in his cattle, didn't run exactly true to form. He quietly accepted the situation and awaited the police veterinarian who was due the following day. That particular official did not turn up next day and the rancher was anxious to be on the move. At the end of a week, there was as yet no officer in sight and the rancher's jaw began to stiffen and his eye to lose its twinkle. He walked over to the barracks and informed the O.C. that he was satisfied there was no mangle in his cattle, that he couldn't afford to be here all summer and that he had decided to hit the trail at 9 o'clock in the morning.

Having thus delivered his ultimatum he continued, "Of course, I expect you will arrest me before we are across the track and that won't be pleasant for me. If you do and there is no infection in the cattle, I may not be particularly nice to you."

"You have it right," admitted the officer, but he remained inexorable. Now a square shooting rancher, who knows he is right and has plenty of time to prove it, he was an officer in a scintilla time who insists that he wait still longer for a veterinarian who is already several days overdue, makes a situation that is most of the ingredients of dynamite. In this case it flared that both were gentlemen and the manner born and the fireworks did not materialize. The rancher conceded one more day and the proper authority, with saving grace, appeared in the meantime to give the cattle a clean bill of health.

The incident marks the beginning of real progress in the career of J. L. Walters, Clive, Alberta, for the young rancher was no less than he was the last leg of a journey which took him from Clive some two or three years before in search of a better location to develop his Shorthorn herd. He was now returning to the point from which he started, with no more cattle than when he left, but vastly richer in experience.

Having learned that "distance lends enchantment to the view," he was now satisfied that the pasture at home is just as green, if not more so than it is far away. He settled down on the old spot, called the place "Homebreds," and his cattle soon increased in numbers. The herd grew until for several years it has been the largest herd of pure-bred Shorthorns in Canada and the owner prospered until he is now senior partner in the firm of J. L. Walters and Sons, which also operates a farm at Clive as well as a

ranch running 1,000 head of commercial cattle and 200 horses in the Big Valley country. There are three sons, John being the eldest, and Henry in charge of the farm, and George who looks after the Shorthorns. A fifth partner, who plays an important role in the smooth-running organization, is Mrs. Walters, who not only manages the household but also keeps the accounts. There are also five daughters, some in homes of their own and the others still in school.

The Walters' cattle first came under the writer's observation several years ago at a Calgary bull sale. If memory serves me well there were some 30 head of their bulls on the list. Their outstanding characteristics were uniformity and utility; big, breezy, well fleshed, rugged cattle with great coats on them, they were the kind that would do a lot of good in a ranching country.

The opportunity to see the herd from which these bulls came presented itself last summer when I spent the greater part of a day on the Walters' place. It was then I learned, and evidence aplenty was before me, that for 40 years Jim Walters has been aiming for just that, utility ranching cattle. And he has them in numbers, about 400 head of registered stuff.

Here are the matrons that brought forth the kind of bulls that, with appreciable improvement as the years go by Walters has taken to the bull sale at Calgary every year except two since the sale was organized in 1901. The cows are big, deep breasted individuals, carrying lots of natural meat and the calves at foot are thick, thrifty fellows, with plenty of quality. The senior herd sire at the time of my visit was Jealous Eclipse (imp.) a grand beast. Kept in good working condition rather than in high flesh, this bull had character, type, fleshing, quality and smoothness which undoubtedly added to the value of the herd. The sire of the bulls which has always been to the fore in Walters' highly constructive breeding operations. It is a grave misfortune that this bull and some other cattle were lost in a disastrous fire on the farm last summer.

Asked who are some of the more important phases of the business of building up a herd Mr. Walters says, "Two of the most important points to keep in mind are type and smoothness. One of the breeder's most difficult problems is the securing of a really first class sire. It has been my experience that an outstanding individual does not always prove to be a good breeding bull. It is important, if possible to find a sire that is bred in use on good cows, so you may see how he has been breeding before purchasing."

"In order to keep your herd up to a high standard it is also important that careful attention be paid to the feeding and developing of young stock. Even a herd that has the best of breeding stock to begin with, requires unremitting care and attention to maintain their standard."

Calves in this herd arrive at all times of the year and are distributed the breeding so that the greatest possible use can be made of a good sire, and essential in such a large herd.

Winter quarters consist of sheds and barns and are fed liberally on hay, cut green oats and grain. Other cattle receive hay and cut green oats with grain as necessary to keep them happy and doing well. There is no "muzzing" the object is to develop a good honest breeding stock rather than show cattle.

Equally as important as breeding and feeding is weeding. As in any other business it is necessary in a "position of this kind that the breeder's activities are taking more importance, that it continues to be salable. Future sales depend upon the performance of animals that have previously left the herd. It follows that breeder must carefully watch his reputation by offering for sale only animals which should give a good account of themselves. It is just ordinary common sense, aside from pride in good cattle, that a breeder should do as Walters does, cull any females that do not measure up and send them to the ranch and castrate bulls which have any possibility of being less than a credit to the herd they represent.

The mention of show cattle suggests a most interesting phase of Walters' activities as a breeder. Although the most extensive breeder of Shorthorns in Canada you will search in vain for any record of him on a circuit fairs until 1931. Overfitting a good breeding animal does not square with the sense of the fitness of things. Last summer, however, he departed from the rule and sent a few head to Calgary and Edmonton summer fairs and also a boat or two to the Royal, with results that amply vindicated his judgment and placed his herd if it needed it, in the forefront of Shorthorn society as it has been for many years distinctly a leader as a practical proposition.

Winning in the tan bark ring of the A circuit fairs is a real accomplishment, especially so when the exhibitor draws only on his own herd to do it. Walters derives a deal more kick and satisfaction, however, from his winnings in another field. The real test is in the final analysis of any breed of cattle, or other livestock for that matter, is their annual pilgrimage to the Calgary

show. J. L. Walters and Sons like more special prizes, cups and shields than there is space here to tell about.

As a rancher, breeding cattle to suit ranchers, he is a decidedly progressive one. As a rule ranchers raise cattle and others finish them; at any rate ranchers seldom stall feed. Of late the tendency is to finish them younger and younger until the last few years emphasize baby beef. Just to satisfy himself and others who might be interested that he has the right kind of cattle for the purpose, Walters put a car load of calves on feed last winter and took them to the spring show at Calgary and Edmonton. He drew a second in Calgary and a first in the capital city.

Although, contrary to the usual procedure, Walters established his supremacy first as breeder of utility cattle, having done that, his entrance into the A circuit has shown that his cattle also belong in the elite of Shorthorn uppercut.

In building up this proposition there have been ups and downs. That the ups surpassed the ravages of the downs there is no doubt, and the holdings would not have expanded to include a 21,000 acre lease and the stock thrown in the Big Valley country in 1916. The ranch creates an outlet for a few bulls from the home farm and the use has increased the weight and improved quality of annual crop of beef. Surplus females from the home place are also cheerfully absorbed on the ranch. On the other hand, the farm takes horses for power from the stock. Beyond mentioning it and a few of the inter-relations with the farm, space does not permit any further discussion of the Jay Bar cattle and horses.

On the farm they raise mostly wheat, oats and barley. Attempts to grow alfalfa and sweet clover have not been particularly encouraging, although a fair stand of alfalfa was up and promising when I was there. There are some 1,300 acres of crop and the balance of the cultivated land is mostly fallow. The same care that characterizes the management of the cattle is exercised on the farm. It is particularly noticeable in the care of the crops. Horses with six a standard outfit, are used for power with a tractor giving a lift in the pinches.

As we have observed, this man doesn't always follow the beaten track. The reason for the reason he was born in B. I. instead of Ontario, or the British Isles or Iowa. But he really couldn't help the fact that his father had a wandering foot which took him from Essex County, Ontario, to California in the gold rush. When that petered out he gravitated north, picked up some cattle on the way and eventually established a ranch on the Caribou trail. It was here that the son James was born. Later they moved back to Essex County and in 1892, Jim moved west with a car load of stuff that included some 10 head of registered Shorthorns, and settled on the present site. It was '97, after a very severe winter that he began his search for pasture green, taking with him his wife and family as well as the cattle.

Their first move was to the same country where they now have the ranch. From here they moved that same fall to the south fork of the High River, fording the Red Deer in a blizzard on the way. There it was decided that Old Man River near the U.S. boundary was a better location. It proved satisfactory except for one thing. Mr. Walters didn't wish to brand his pure-bred cattle; they began to disappear in ones and twos. He finally decided they were going across the line where it was difficult to locate them and even more difficult for a Canadian to establish his ownership. It became a matter of quitting the pure-bred or

moving again, so they rounded up the cattle that were left, the family climbed aboard the spring wagon, and they returned to the point from which they started two or three years before.

A modest man, the subject of our sketch, isn't keen on talking about himself or his accomplishments. He is, however, an excellent host and when you get on the other side of the desk in his library he just can't help warming up. Among his cattle and in the fields you talk to a keen pleasant business man; in the library you swap yarns with a man who, has been for 40 years an Alberta rancher and your contribution to the entertainment shortly fades out in the face of the other's color. The Alberta cattle country is brimming full of material for the raconteur, and Walters as becomes his position, has absorbed therefrom with rare discrimination.

A little back we mentioned that there were downs as well as ups in this history. About 1900 the pure-bred business was in the doldrums and the breeders had built their stock's sell. In the fall of that year, Walters was one of those who, with the late Senator Talbot, organized the Alberta Cattle Breeders' Association which has conducted bull sales in Calgary ever since as well as for 12 years at Lacombe. One of the breeders at the meeting suggested they might have to bring their bulls home and the expense would be overwhelming. "Bring them home," came back the Senator, "we'll throw the bulls in the river, first." But the bulls sold and everybody was satisfied and the Calgary bull sale lived to become the event of its kind on the continent. Some 10,000 bulls have passed through the Calgary ring for nearly \$2,000,000 and Walters has contributed more of them than any one man—over 500 head.

During nine of the 30 years life of the association, he has been its president. He is also president of the Southern Alberta Shorthorn Association and vice-president of the Western Canada Livestock Union.

Not many ranchers escape the depredations of that lowest of snakes, the rustler, and this one is no exception. A few years ago a car load of fine steers disappeared from the ranch and no trace of either thieves or cattle has been found to this day. He had a little more satisfaction, if the salvage wasn't great with another crew who lifted a car load of horses within two miles of his home, more recently. Over-indulgence in the cup that cheers in the celebration that followed the success of their venture, was the clue that finally landed the culprits for a lengthy period in that hole of solitude where bread and water is the staple diet.

## NOTICE TO CREDITORS

AND CLAIMS IN THE ESTATE OF MARY McCUTCHEON, late of the Town of Lacombe, in the Province of Alberta, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above-named Mary McCUTCHEON, who died on or about the 26th, day of September A.D. 1931 are required to file with the undersigned Solicitor for the Administration of the estate of the said Mary McCUTCHEON, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will proceed to distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or of which knowledge he has received.

Dated this 11th, day of February A.D. 1932  
J. S. McCormick, Lacombe, Alberta, Solicitor for the said Administratrix.

We have just installed the finest and most up-to-date

## ELECTRIC WELDING

equipment that is manufactured and we feel that this \$1500.00 outfit should be a big Asset to Lacombe and Central Alberta. It is built right in an automobile chassis and can be taken any place as we operate it with gasoline.

Being the only machine of its kind between Calgary and Edmonton, and one of the largest available, we should get your welding which will cost you no more for MODERN WORK.

We can weld anything and particularly cracked motor blocks and cylinder heads which up to now had to be sent to Calgary or Edmonton.

Give us a trial or at least come in and see this machine. You will be quite welcome as we are proud of it.

## Fragrance Sealed In Metal

## In Times Like These

In the course of the more or less extensive reading in which every man in newspaper work must engage, our attention was attracted by a magazine article bearing the title "In Times Like These," written by former U.S. President Calvin Coolidge. Coming from the pen of such a noteworthy man we felt assured that it would be a worthwhile article. We were not disappointed, and have decided to pass on to the circle of readers of this weekly column some of the thoughts expressed by the only living ex-President of the United States in the hope and expectation that they may be found helpful and provide encouragement to others.

Mr. Coolidge expresses the opinion that one of the serious results that come from the experience through which the world has been passing for the past two years is "loss of faith," and he proceeds to show that if a man but keeps his faith, regardless of anything and everything that may happen, there is still a bright future before him.

The difficulty is that because some have put their trust in things which they have found to not always endure, they draw the hasty and unwarranted conclusion that it is useless to have faith in anything. Furthermore, there is a tendency, and it is this, to conclude that whatever disasters may have overtaken an individual for him to conclude that they have arisen through no fault of his own; rather that it is the fault of someone, and he is inclined to blame something he loosely calls society.

It is true that some have lost through the dishonesty of others. Many more have lost because they were tempted to take large risks in the hope of making large gains. Some did make large profits, but many more suffered heavy losses. Frankly, it must be said that those who trust to chance must lose by the results of chance. They have nobody to blame but themselves.

In Western Canada, however, probably the larger number of losers are to be found in Mr. Coolidge's third group, those who have sustained losses notwithstanding the exercise of their best judgment and through causes beyond their own individual control. But this simply means what everyone should know; that even when surrounded by all the safeguards and all the integrity which is possible to secure, the ownership of property involves a risk. The man who has nothing runs no risk; it is the man who has property who is liable to suffer. Nevertheless no sane person prefers to be the former rather than the latter.

The man who owns a house may lose it by fire, by flood, by a devastating storm. A man's livestock may be sickened and die. A man may lose his crops by drought, or hail, or insect pests. World conditions may force prices to a below-cost-of-production basis. He cannot help these things, but that does not excuse him from making the most of what he has. The great fact of life is uncertainty, as Mr. Coolidge points out. The only thing we can do is to recognize the uncertainty and govern ourselves accordingly.

It might be a great personal comfort if we could lay all the blame for our misfortune upon some source outside ourselves. That is why it is easy to convince some of us that we have not failed, but society has failed. But while there is a relationship of all of us, which we term society, that differs from each of us, just as a house differs from the individual bricks in it, yet people are not bricks, and moral responsibility cannot be shifted to others. If we are to be free to make our own choices in life, we must take the risk of being responsible for the results.

If we could lay the blame for present conditions in the world on society at large, against whom is the blame to be assessed? It is impossible to point out any general moral lapse, any widespread dishonesty. We may say it is the result of greed and selfishness. But what body is it to be specifically charged with that? Were the wage earners too greedy in getting all they could for their work? Were the managers of enterprise, big and little, too greedy in trying to operate at a profit? Were the farmers too greedy in their production or in co-operating to get higher prices for their products?

No, the most we can say is that there has been a general lack of judgment so widespread as to involve practically the whole world. Each and every one of us must assume our full share of responsibility for that lack. We have found out that we were not so big as we thought we were. We were riding too high. We shall have to keep nearer the ground. We may not feel so elated but we shall be much safer.

We must realize that the best recipe for financial security is to live within our means. That is, our ancient faith. We have found nothing better.

We must re-learn the old Biblical admonition: "Thine own right hand can save thee." We must realize that governments are not all-powerful, that present relief measures are but a crutch to help us for a moment when we cannot otherwise help ourselves, but that our salvation, our whole future, rests with us as individuals.

There is no power that can absolutely guarantee us economic security. We think we want relief from toil and worry, forgetful that our own satisfactions are in our achievements. If we will but make the effort to develop them, if we will apply ourselves faithfully to our tasks, we shall all find we have powers we did not know we possessed.

## Drop In Living Costs

Reduction Of Fifteen Per Cent. During Last Two Years

Cost of living has dropped by over 15 per cent. during the past two years, the Dominion Bureau of Statistics reports. This is the second largest decrease among the leading nations, the United States leading with a drop of 16.5 per cent.

Germany ranks third with a 12.9 per cent. drop, Great Britain fourth with 9.6, and France fifth with 9 per cent. One of the reasons Canada, United States and France rank so high is the extensive agricultural developments of these countries.

## Hard Times For Chef

A year ago Chef Francisco Arroyo was preparing dainties for kings and queens, princesses, and princes. Today he labors over Spanish stew for the city bread line. He replies to questioners with graceful Spanish casualness, as he manipulates pots and pans in the free kitchen maintained by the city.

Aviation is revolutionizing passenger and mail transportation in Latin America.

U.S. Women Unionists are starting study classes in politics.

## Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storm, R.R. 6, Picton, Ont., writes: "I was troubled with palpitation of the heart, could not sleep, day or night, and was so weak I could hardly get around. After taking Milburn's Heart and Nerve Pills I was greatly relieved of these attacks. My mother also has great faith in them and finds no other medicine can help her so much for heart trouble."

I can assure you that Milburn's Heart and Nerve Pills are a wonderful builder."

Price 50c a box

MILBURN'S HEART AND NERVE PILLS

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

## Man Without a Country

Pitiable Plight Of Negro Who Was Deported From Canada

Chained to a grating in the hold of a ship in port where he has remained for more than a month, is another man without a country.

He is Cecil James Scott, 29-year-old negro deported from Canada and unwanted in his alleged homeland of Bermuda. He was put aboard the steamer "Borland" at Halifax, and when permission was refused to land him at Bermuda or Demerara where the authorities had no information concerning him, the only alternative was to bring him back to Canada.

Having previously been deported from the Dominion, he was refused admission when the "Borland" arrived at St. John, and now the captain and immigration officials are wondering what they shall do with the passenger.

The steamer's owners are liable to a \$1,000 fine if the deportee escapes. So "down below," in an improvised cell formed by a grating, is the man without a country, his right wrist fastened to the steelwork and a blanket serving for a bed.

## Cut In Salaries

Manitoba Government Officers Six Per Cent Reduction All Along the Line

Six per cent. cuts in salaries of all employees of the inside government service, from cabinet ministers down to the lowest paid civil servants, were ordered by the Manitoba Government. The cuts were effective as from Jan. 1. This order will make provincial salary cuts the highest of any government in the Dominion.

It is anticipated that governing bodies of provincial services and educational institutions will follow the lead of the government and also order corresponding cuts. A saving of \$200,000 is expected to result from the reductions.

## Ship Fox Skins

Seven Thousand Pelts Leave Quebec For London Market

During recent days 7,000 fox skins have been shipped from Quebec to be placed on the London fur market, according to information given out at the office of the Co-Operative Fur Animals Raisers of the province of Quebec. This shipment of skins, the largest ever sent from here, is valued at \$200,000 and consists of all of skins of the best quality.

In the face of orders on hand at present, Co-Operative officials say, it is probable that an additional 13,000 skins will be shipped to foreign markets in the very near future.

## Real Benefit To Farmers

Shipping Club In Quebec Markets Produce To Advantage

A fine example of the real benefit to be derived from co-operation in marketing their products is afforded by the results obtained by the Campbell's Bay Shipping Club, of Pontiac County, Quebec. This year to date the club has marketed 250 head of cattle, 250 calves, 1,150 lambs, and over 12,000 pounds of dressed poultry, representing cash returns to the farmers of that district of well over \$15,000. The Federal and Provincial Departments of Agriculture have co-operated effectively in making the scheme a success.

## Persian Balm Tones and Stimulates

the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexion of exquisite charm. Adds a subtle finish to the skin. Makes it invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Delicately fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

## Cannot Hoard Gold

Viennese who have taken to hoarding gold in their mouths in the form of fillings, crowns and bridgework have bitten off more than they can chew. Firms which cut gold bridges and similar material for dentists, have been doing a good business lately. The National Bank, which now has the sole right to sell gold, says temporarily fillings will have to do until the gold crisis is past.

Toothache and neuralgia are instantly relieved with Douglas's Egyptian Liniment. A quick, sure remedy. Also recommended for burns, sprains, sores and inflammation.

The total value of building and construction awarded in Canada during 1931, as compiled by Maclean Building Reports Limited, amounted to \$315,482,000. Ontario led all the provinces with \$125,452,300, or 39.8 per cent. of the Dominion total. Quebec comes next with \$106,125,700 or 33.6 per cent.

## Land and Water Ferry

Hotel guests at Devonshire, England, now use a ferry that travels on land or sea. It is equipped with tractor wheels for land, and a propeller is driven off the tractor motor to drive the ferry through water.

Pulverism is a disease which attacks poultry in much the same manner as typhoid does humans.

## Astrologer Makes Some Unpleasant Predictions

Says 1932 Hard Year For Cattle and Married People

Prof. Gustave Meyer, of Hoboken, New York, who describes himself as "the nation's counselor and American scientific astrologer" cast his eyes heavenward, added up several rows of figures and predicted that 1932 is going to be a tough year for cattle and married people.

In scanning the planets for his annual first-of-the-year forecast, Professor Meyer considers that Japan and China are going to have much trouble, and that Japan will get the best of it in the long run. He feels that prohibition is going to have a "terrible time" during 1932, that prosperity is coming back to stay, that Colonel Lindbergh and Henry Ford are better watch their step in February and that next Fall there will be plenty of rain, snow, hail, thunder and lightning, floods, earthquakes, bank failures, broken legs and stomach trouble.

Among those who will suffer during the year, according to the professor, are theatrical people, steamship people, bull traders, naval officers and cabinet members.

Those who will enjoy good luck include literary people, scientific people, astrologers, mining men, real estate agents, President Hoover, soldiers, diplomats and all the unemployed.

## International Corner

London 'Phone Operators On World's Switchboard Speak All Languages

The girls of "International Corner" are busy polishing up their French, German, Spanish and Italian in preparation for the opening of the world's switchboard.

They are the girls who can say "number please" or "line engaged," "I will call you later," in all the languages of Europe, and they will control the world's switchboard which is being prepared in a room at the Central Telephone Office, Carter Lane near St. Paul's.

If a man in Paraguay wants to talk to someone in Madrid, Budapest or Moscow his voice will go through that room. There will be 120 overseas operating positions, and 20 radio channels to America, Australia, New Zealand, South Africa, Canada and India, and it is anticipated in due course, to India and Japan.

Each girl at "International Corner" speaks one foreign language. One girl speaks three foreign languages.

## New Speed Boat

Wealthy American Said To Be Negotiating With British Firm

The London Express states that an unnamed "wealthy United States car manufacturer" was negotiating with Fred Cooper, designer of the motor boat "Miss England II," to build a boat to compete with "Miss England III," which now is being built in Britain.

The new boat would be built in England, the newspaper said, and might have United States engine. The Express said it underwent a speed of 145 miles per hour was sought, which would be almost 35 miles an hour more than the existing record.

With all the advances made in fighting tuberculosis, this disease still takes more lives between the ages of 15 and 45 years than any other disease.

Teacher: "What can we presume from the fact that men's brains are larger than the brains of a woman?" Girl Pupils: "That it is more a question of quantity than quality."

"Before I accepted you, eight men had proposed to me. All more intelligent than you."

"Naturally, or they would have married you."—Lustige Sachen, Leipzig.

## Gold Is Hoarded While People Starve

Bars Worth Five Billion Dollars In Vaults Of United States

There is upwards of \$5,000,000,000 worth of nice glittering gold bars in the vaults of the United States.

It has been gathered into these vaults, hoarded there, over a period of years.

Yet recently, at Washington, a United States Senator, Robert M. La Follette, pleaded for an appropriation of \$250,000,000 to keep 7,000,000 Americans from starving.

Still another Senator, Costigan of Colorado, asked for \$250,000,000 for the same purpose.

And some observers, in a position to speak, place the number of United States unemployed at more than 8,000,000.

What an extraordinary sidelight upon the demoralization of the existing industrial civilization!

Here is a country whose Congress has just said that Europe, no matter what its position, must pay its war debts. Europe, impoverished on the verge of chaos, cannot pay, has been brought to the point where it is no longer a market for work again.

And so it goes, from worse to worse. Europe is being crippled, trade is being paralyzed, and meanwhile 7,000,000 Americans are poverty-stricken on a veritable mountain of gold.—Ottawa Journal.

## Safe Speed Not Everything

Having Car Under Control Secret Of Careful Driving

It cannot be too often repeated that a safe speed is an entirely relative matter and depends upon traffic conditions. A legitimate rate of twenty miles an hour may be excessive under a wide variety of circumstances. In crossing intersections, even with the signal lights, too many cars travel at a rate at which they are not under control in case of sudden emergency. In making a turn, whether right or left, the motorist must remember that he is crossing the path of pedestrians who have the right-of-way, and must moderate his speed accordingly. He must not let the car become the bully of the road.

The essence of careful driving is that the car shall be under sufficient control for any emergency which may be anticipated, and that the motorist shall be on the alert to meet any emergency which may arise. Children may dart out from behind parked cars or other obstructions, pedestrians may stray where they have no right to be, but neither the thoughtlessness of the child nor the carelessness of the pedestrian absolve the motorist from constant care and watchfulness the man who is driving three-quarters of a ton of machinery through streets with a high momentum.

## Geography and Matrimony

Large Percentage Of Couples Usually Live Near Each Other

The importance of "residential proximity" in affairs of the heart has been looked into by James Bossard of the University of Pennsylvania. He studied 5,000 marriage licenses issued in Philadelphia and found that 51 per cent. of the contracting parties lived within two miles of each other, 23 per cent. within two blocks, 17 per cent. within a mile, and 12 per cent. gave the same address. Fate, which sociologists can take little account of, was presumably the important factor in most of the other cases. Although the figures are about as one would expect, the results may be called a victory for regionalism, in view of the efficiency of modern transportation and communication.

## Western Optimism

A woman in Montreal, a widow of 60, wrote to Mayor Webb of Winnipeg saying she wanted a husband. One man who answered said he was "broke," had not held a job for a year, but was certain he could "make the lady very happy." Optimism always has been one of the chief assets of the West.

Experiments are being made in Chicago, Ill., of a ray-producing device which, according to the inventor, will destroy ammunition on land, air, or sea at will.

Complete in itself, Mother Graves' Worm Exterminator does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Compressed air apparatus has been perfected to increase the volume and improve the quality of the tones from loud speakers of either radio or phonograph music.

The total expenditure by the different provinces of Canada on main provincial highways during the year 1930 was \$34,502,759.

A new material for phonograph disks is capable of recording on one disk double the amount of music on an ordinary disk.

## Shipping Gold To Britain

India Expected To Double Last Year's Entire World Output

India has shipped more than \$100,000,000 worth of gold to London since Great Britain suspended the gold standard, and if shipments are continued at the present rate they are expected to double last year's entire world output of gold which was approximately \$100,000,000.

More than in any other country in the world gold is the standard of value in India. All classes hoard it in the settings for jewelry, coins and other valuables, and banking systems, scarcely known in the Indian village. Whenever an Indian in the interior wants paper money he ships his articles of gold to the government mint at Bombay where they are melted and coined.

New Ideas For Cars

Many Advanced Methods Will Feature Automobiles Of Future

The automobile industry, in its quest for new features to intrigue the buying public, spends millions of dollars annually in experimentation on advanced methods of automobile construction. Many of the ideas which result from the extensive research of the industry's engineers seem radical at first glance, but are a forecast of what may be expected for future automotive transportation.

Among the many possible developments discussed in engineering circles is such a startling suggestion as a gasolineless, waterless car, propelled by radiated electricity. Another unusual proposal calls for the use of an airplane type of construction for cars, with large fenders and a combined roof and wing structure lifting a considerable amount of weight from the road, and with propulsion furnished by a propeller.

Sores Heal Quickly.—Have you a persistent sore that refuses to heal? Then, try Dr. Thomas' Eclectic Oil in the dressing. It will stop sloughing, carry away the proud flesh, draw out the pus and restore a clean way for the new skin. It is a recognized healer among oils and numbers of people can certify that it healed where property applied.

## Forestry Patrol Work

Brooks Airways To Undertake Government Work In Northern Saskatchewan

Forestry patrol work and government flying operations in northern Saskatchewan will be conducted during 1932 by the Brooks Airways, Limited, of Prince Albert. Arrangements for this work were completed between government officials and R. D. Brooks, head of the Airways. The Brooks Airways conducted similar work for the government during the past year.

At the present time the Airways is operating four machines, two Stinsons and two Buells, with a staff of three pilots and two mechanics.

An Unknown Object

An Ohio editor claims he can take the younger generation down a peg by asking any of them, "What's a whiffetree?" It seems an average youngster today doesn't know whether whiffles grow on trees or vines.

## Stockmen Elect Officers

Meeting Of Canadian Livestock Co-Operatives Held At Saskatoon

## Places Unknown To Man

Large Unexplored Regions In Arctic and Antarctic Regions

Although the airplane, the motor car, the motor boat and other mechanical conveniences of recent years have helped wipe out many of the larger blank areas, marked "unexplored" on the maps of the world, the National Geographic Society, in a current bulletin, says there are still "many regions traversed only once or twice in history and a few that have never been seen by civilized man."

"Unquestionably the largest unexplored spot in the world today lies in the continent of Antarctica," the bulletin states, adding that though the Pole has been reached three and the coastline sketched, of the interior only the pie-shaped sector leading inland from the shore of the Ross sea has been explored.

"Antarctica remains the greatest stronghold of nature against the curiosity of man," it continues. "Next largest lies at the opposite end of the earth, that part of the Arctic Ocean between the arctic 'Norge's' path, on its flight over the North Pole and the coast of Siberia. It measures about 800 miles long and 400 miles wide, with an area about the size of Texas."

Large tracts in Greenland, Arabia, South America and Australia, have yet to be seen by man, the bulletin states.

## Says Farmers Should Pay More Attention To Marketing Instead Of Concentrating On Production

Expressing the belief that the next 25 years would see the emancipation of agriculturists from domination by better classes themselves, H. S. Arkell, secretary of the Canadian Livestock Pool and president of the Canadian Society of Technical Agriculturists, speaking at a gathering of the latter organization at Saskatoon, asked their assistance in that regard.

The society had made great strides since it was formed in 1921, and now included most of the technically trained agricultural men of the Dominion. In the past, the members had chiefly concerned themselves with their own jobs and the co-ordination of work done under different authorities to make it efficient. They had accomplished a great deal in that direction.

But Mr. Arkell believed the time had come for the society to turn its attention to the marketing of agriculture. It was for the betterment of agriculture that they had received their training.

From the point of view of the farmer, the selling machinery under the old methods had failed them. The credit machinery had failed them, and they would find that the majority of farmers believed that the technical machinery of agriculture was failing to accomplish the purposes of the farmer.

Agriculture had taken care only of production and left someone else to take care of marketing. In all other businesses an increasing proportion of the brains was devoted to merchandising. Something should grow up in technical agriculture in regard to the business end as in production. It was planned, the speaker said, to hold the annual convention of the society in Winnipeg in June, when it might be possible to secure speakers from the economic conference.

Dr. L. E. Kirk, Dominion Agrostologist, suggested that other business men had perhaps devoted too much attention to merchandising and persuading the people to buy what they did not want, rather than that agriculture had given too exclusive attention to production.

W. A. Munro, Rosthern experimental farm, agreed that farmers at the present time were much more concerned with what they were to do with what they had produced than with how to produce more or better articles.

Guests introduced at the gathering included: C. H. Gilbert, Big River, spring wheat champion at the Chicago show, and Andrew Anderson, Alaska, recently designated "master farmer."

### To Settle War Debts

Suggests Exchange Of African Territory Instead Of Cash Reparations To State

The rich Congo basin, lying in the heart of equatorial Africa, is proposed as payment by debtor countries, in the stead of cash reparations to the United States, by Stephen Leacock, head of the Department of Political Economy at McGill University, Montreal, in an article appearing in the New York Herald-Tribune Sunday magazine section.

Describing this area of 1,500,000 square miles, now owned in its three divisions by Belgium, France and Great Britain, as "exuberantly fertile," Professor Leacock points to the great possibilities of development. He sees the great Congo river as the "real gateway for African trade," and says a real seaport at the mouth of the Congo would "become one of the great harbors of the world's shipping."

He says the United States with its money, machinery and brains, is the one country to undertake the great development. Thus, would be set in motion, he believes, "a new world movement of prosperity."

**Death Ends Long Seclusion**  
Panny Read, 89, who left the seclusion of her home only four times in 67 years after her father forbade her saying goodbye to her soldier sweetheart in the revolution of 1862, is dead at Birmingham, N.Y. Miss Read shut herself in her home and left it only four times—each time for the funeral of a relative—during the ensuing 67 years.

New municipal houses in Dundalk, Irish Free State, are being rented at \$1.75 a week.

"How did you get so much strength in your mouth?"  
"I have developed my teeth with your steaks."—11 420, Florence.

### Greater Precipitation

Report Of Meteorological Service For Month Of December Is Encouraging

Precipitation in Saskatchewan over the cultivated portion, during December, 1931, was approximately twice that of December of the normal year, according to the report of the Dominion meteorological service for the month.

In average years, precipitation in December varies from four-tenths to about eight-tenths of an inch. During December, 1931, from one inch to one and a half inches was reported over a considerable area in Saskatchewan.

In the extreme southeast and in a small area to the east of the Cypress Hills several points were exceptions, reporting less than four-tenths of an inch of precipitation received during December.

Alberta rejoiced in precipitation that was in excess of the normal. In December from one inch to one and a half inches was reported from a considerable portion of the plains. Usually the December precipitation in these areas varies from less than one-half to about three-quarters of an inch.

A dry December was the experience of Manitoba, where most sections reported less than half an inch and some less than one-tenth.

In the north-west, of years, December precipitation is slightly greater in Manitoba than in Saskatchewan, ranging from one-half inch to one inch.—Regina Leader.

### Warm Wave Just Happened

Is Opinion Of Meteorological Experts Regarding Last Year

Warmer and drier weather than its customary was experienced by Canadians during the past year. From this it should not be inferred the Gulf Stream has taken a jog to the west to the Arctic is warming up, says the Canadian Press.

"No, sir, nothing of the sort," said the weatherman in discussing conditions during 1931. He followed up this statement with the inevitable references to cold and warm cycles, pressure, depressions, air circulation and disturbances. He said that their meteorological trappings, his words conveyed the impression that the warm wave "just happened."

Statistics compiled by the Dominion Meteorological Service indicate that temperatures generally were above normal. In Canada, weather was warmer in all months with the exception of May and June while the West fell below in the averages in two months—March and May.

### Apples Are Cheap Food

Essential Part Of Diet And Suitable For Every Meal

In a period like the present, when the amount of money available for food may be limited, apples are an essential part of the diet, says Miss Flora Carl, of the Missouri College of Agriculture. Apples and their products for every meal in the day and are often enjoyed between meals also, she goes on. "As sauce or baked, apples serve as a breakfast fruit, and with bacon or sausage they may accompany the meat dish. For dinner they are especially good with fresh or cured pork, no matter how it is cooked. They are adapted to cooking with many vegetables, as baked with sweet potatoes, fried with carrots or scalloped with cabbage. A wide variety of salads may be made from apples, either raw or cooked with vegetables, and the choice of apple desserts is almost unlimited.

In 1930 British Columbia produced 565,000 pounds of factory cheese compared with 39,450 pounds in 1929, an increase of 1330 per cent.

Beware of the man who over-emphasizes his desire to be fair and honest.

### France Buying Wheat

French Government Contracting For Ten Million Bushels Of Canadian Grain

Delivery has started on a French government contract to buy 10,000,000 bushels of Canadian hard spring wheat, the United Press learns.

The agreement represents a repetition of an order for a similar amount in 1930. Delivery will continue for two months.

It was understood that France expected a reciprocal concession from Canada favoring either French wines or silks, but no agreement has been reached.

It was estimated that France still requires 11,000,000 bushels of foreign wheat to meet the deficit in domestic supplies.

Wheat representatives were awaiting indications of whether the foreign office would continue the policy of buying Central European wheat for political reasons, or would buy the balance in the open market from Canada, the United States and Argentina.

## Foundations Of Liberty

Present Social and Economic Structure Undergoing Severe Test

President Nicholas Murray Butler of Columbia University, sent to his friend this statement with his customary Christmas card:

"Those social, economic, and political institutions which the modern world has built upon a foundation whose cornerstone is Liberty are now on trial and under fire as never before in their history. Since Magna Charta it has been their lot to attack and to win one great contest after another of the battlefields of ideas and of institutions. Today, instead of attacking, they are being attacked.

In every land Liberty and its products and accompaniments are subject to an assault which is often well reasoned and sincere, and sometimes impetuous to the point of violence. The critics and opponents of Liberty propose to substitute for it 'Compulsion' in some of its many forms.

In the mildest and least revolutionary is Socialism. The most reactionary, destructive and despotic is Communism. The most efficient, while it lasts, which usually cannot be long because of its very personal character, is Dictatorship.

To achieve its declared ends, Liberty must always and everywhere be accompanied by justice and by kindness. It may not be made either the reason or the excuse for treachery under foot, the less for the sake of the less capable of our fellowmen. The free man socially-minded is the hope of the world. Should Liberty fall, there is nothing but Compulsion to take its place.

### Ravages Of Bovine Disease

Theory Advanced That Buffalo Herds May Have Been Decimated By Infection

It now develops that the vast herds of buffalo which once roamed western plains were not entirely wiped out by avaricious hunters. The real villain in the piece has just been discovered. It is none other than hemorrhagic septicemia.

Dr. E. A. Bruce, Dominion pathologist, in a recent report, revealed to British Columbia veterinarians in the course of an address, that the noble bison may have been killed off almost to the point of extinction by a dread disease which is today taking heavy toll of herds and flocks throughout the continent.

Hemorrhagic septicemia is the name given to a germ which flourishes in unclean barn yards, filthy hog wallows and neglected hen houses, ramshackle sheep corrals and unsanitary rabbit hutches.

Dr. Bruce said that live-ravages are becoming more extensive in certain sections, although British Columbia flocks and herds are comparatively free from infection.

### Noise Affects Eyesight

One person in every five in the towns and cities is wearing, or ought to be wearing, spectacles. The proportion in the rural areas is only one in every 100. An eye specialist said: "During the war one of the effects of shell-shock was a narrowing of the vision. Perfect eyesight depends on perfect nerves, and town dwellers today are exposed to a nerve-shattering barrage of noise which differs only in degree from a great gun cannonade.

### Folds Up After Work

The Robot maid that acts as cook, masseur and dish washer is here. Called the electro-magnetic labor eliminator, this current-directed and tireless worker made its appearance at the annual electrical show in Chicago. When the day's work is done, the apparatus folds up and retires under the kitchen sink.

A writer asserts that a man's character can be told by the books on his library shelf. Then most of our friends are kleptomaniacs.

### Egg Exports From B.C.

Are Bringing Producers Over Five Thousand Dollars Daily

British Columbia hens are bringing into the pockets of poultry owners, as a result of growing volume of shipments of eggs outside the province, in the neighborhood of \$5,000 a day.

The B.C. Egg Pool is shipping to the prairies and eastern Canada three and four carloads of eggs weekly. Private firms are adding further shipments, which, according to G. H. Wilson, of the poultry division, Dominion Live Stock Branch, bring the total up to one carload daily.

Each carload at Montreal brings an average of \$7,000. There must be deducted from this freight charges of approximately \$850 and handling charges of five cents a dozen.

The egg industry is at present the liveliest department of agriculture in British Columbia. Distribution of \$5,000 a day among poultry ranchers is bound to stimulate confidence in the poultry industry.

Egg prices are much lower than at the same time in 1930. Production is also lower. Nevertheless, present prices are attractive to the coast poultry owners. Lower feed prices and lower labor costs help to make up for the reduced prices received for the product.

George P. Wallace, president of the B.C. Egg Pool, reports falling off of production of eggs elsewhere in Canada.

Prof. E. A. Lloyd, University of British Columbia, says that the present export of eggs is but the beginning.

"I look to see British Columbia poultrymen exporting eggs to overseas markets as well as our domestic markets," said Professor Lloyd.

### Soil Survey Map

Enables Farmers To Determine What Crops Will Be Profitable

A soil survey map for the purpose of indicating to farmers the advantages of certain crops in particular districts, was presented by a committee reporting to the annual meeting of the agricultural board of Alberta, held in Edmonton recently.

The map is actually a zonation farm practices map, and is entirely dependent on the result of soil analysis, rainfall and other climatic conditions, and has been experimented with for some time in the United States. C. S. Noble, of Nobleford, who has been in the United States for the past few months studying methods of soil drifting, gave an interesting talk to the gathering on the results obtained from maps of the description presented.

### Saving Waste Product

Profitable Methods For Their Use Are Being Sought

For every pound of farm products profitably used there are from one to two and a half pounds from which the farmer gets little or no return, states Dr. Henry C. Knight, chief of the Bureau of Chemistry, United States Department of Agriculture. His department is trying to find profitable methods of using the millions of tons of farm by-products which annually go to waste. Cornstalks and such waste products offer a greater benefit to farmers than would an increased production of the important crops when there is already a surplus in most of them, the chief believes.

### Advertising Always Pays

The business has not been found in which "advertising does not pay." What capital is to industry, what rainfall is to farm soil, advertising is to business. Advertising is as necessary to national distribution as the railroads.

The reason people are patient with statements is because they don't know what to do, either.

Nearly 40 irrigation projects are to be launched in Jugoslavia in the next four years.

## Scientists Hope To Procure Facts And Figures To Test The Theory That Continents Float

### Sensitive To Weather Changes

Animals Are Very Quick To Notice Any Variations In Weather

Animals are amazingly sensitive to changes of weather, and some very interesting observations have been made as to how they behave under such circumstances. We have all seen the antics cats get up to when a storm is approaching. They wander restlessly to and from, and suddenly dart about the house and garden in a most surprising manner. Cats, too, wash right over their ears when rain is approaching. The following are other unmistakable signs of changing weather: In mountainous districts sheep change their feeding ground to the lee side, or side opposite the wind, of the hills before the arrival of gales and rain. Little field mice, too, appear to know when cold and snow will set in, for they have been observed to cover up their nests carefully before hard weather comes. Donkeys invariably bray lustily before rainy weather, and if bees return to the hive and do not come out again for a time rain is indicated.

### Farm For Strayed Animals

Fifteen Acres Operated By Voluntary Workers In Montreal

"The League of Justice To Animals" with voluntary workers operate a farm of 15 acres at Montreal, the only one of its kind in Canada, where lost, strayed or unwanted animals found on the streets of Montreal are taken, and when not claimed within a reasonable time are placed with new owners. At this home there are adequate kennels for cats and dogs, stables for horses and good grazing land with plenty of shade trees. Every type of creature is cared for, from the smallest cat to the largest horse. Horses whose owners are too poor to feed them properly are taken and within a short time returned in good condition.

In the society's six years of befriending the animals, it has had four Christmas trees set up in various parks and squares here distributing hay, corn and oats to 100 horses yearly.

### Fewer Wolves Taken

Export Of Wolf Pelts Shows Signs Of Falling Off

Production and export of wolf pelts are falling off, which opens up the question as to whether or not wolves are decreasing in Canada.

In the calendar year 1931 the export of the skins of wolves totalled 41,972 at a value of \$388,662, according to the records of the Dominion Bureau of Statistics. In 1929 the export was 88,708 wolf pelts at a value of \$1,603,470.

Saskatchewan is the first province to make a record in the hunting season of 1930-31, when 115 timber wolves and 9,053 coyotes were taken. In 1929-30 the take was 134 timber wolves and 12,717 coyotes.

### Workers Pool Jobs

Even If Laid Off Are Still Assured Of Pay

Employees of five factories at Fond Du Lac, Wisconsin, can snap their fingers at the spectre of unemployment. They are practically assured of steady jobs, and even if laid off will receive pay.

This happy situation is made possible by a co-operative arrangement between the five companies whereby jobs are pooled and reserve funds set up. It is called the "Fond Du Lac Plan." Both office and factory workers benefit under the plan. However, they must be employed a year before being eligible to the benefits.

The employees' income guarantee must have the same consideration given dividends, says William Maute, manufacturer and an originator of the plan.

Royal Palace a Public Museum  
Ex-King Alfonso's former royal palace at Madrid has been opened as a public museum. For the sum of one dollar visitors are allowed to see the throne room, sitting rooms, banquet hall, the famous "Hall of Columns," where so many functions, including that of the washing of feet on Good Friday, took place, but so far they have not been permitted to visit the private apartments and bedrooms formerly occupied by King Alfonso, Queen Ena, and the Infanta.

Mother-Mabel's young man has taken offense at something. Have you said anything to him?  
Father—Not a word. I haven't seen him since I mailed him last month's light bill.

Built to house 150 guests, a hotel in Antrim, England, which is becoming quite a popular holiday resort, has not a single bathroom. The town itself has no public water supply.

Neighbor: "Er — Mrs. Brown — you've got odd stockings on."  
Mrs. Brown: "Yes, dearie, that often 'appens to ladies what 'ave got more than one pair."

### Hidden Away In Vaults In Dominion

Observations at Victoria and Ottawa are scientific records that may prove or disprove some day the truth of the theory that North America and the other continents are not fixed or stationary. Dr. Alfred Wegener, the Austrian geologist who lost his life in Arctic exploration, laid down the theory that continents float on a sea of molten rock like rafts on a quiet ocean. Canadian scientists hope to supply the facts and figures that will determine the accuracy of the theory.

Canada is vitally interested in settling the Wegener theory because Greenland is supposed to be the "speed king" among the continents, crawling westward at a rate estimated as high as six miles a year. Meteorological conditions, especially along the Labrador Coast, the Maritime Provinces and the New England States, would be affected by any appreciable narrowing or lengthening of the distance between the two land masses.

Delicate scientific observations were made some years ago at the Dominion Government Observatories at Victoria and Ottawa. Longitudinal measurements were extended around the world with the aid of beam wireless. The positions of America, Greenland and other countries were plotted as minutely as possible. The observations will be repeated in 1933 and again in 1934, and any variation in the plottings will be noted. By this method it is hoped to establish the accuracy of Dr. Wegener's hypothesis.

The first evidence to substantiate the drifting theory was established in 1907 by J. B. Koch, German explorer. In 1923-24, Sir Edward Sabine, British scientist, made longitudinal observations in Greenland but when Koch took similar readings at the same spot, the figures did not correspond. The only explanation was that Greenland had drifted several miles toward North America in the intervening years.

### Cellophane Invented

By Swiss Chemist

France Was Original Producer Of Transparent Wrapping Material

Cellophane, the transparent wrapping material which is being so generally employed, originally was produced in France. The inventor, J. E. Brandenberger, a Swiss chemist, was born in 1872. It was made in practically the same way as rayon, except that it is formed into a sheet while rayon is made into a thread. Evergreen, spruce wood pulp, or cotton linters are treated in a caustic solution and carbon bisulphide is added to disintegrate the fibers completely. The result of these and other chemical operations is a viscous amber colored liquid. This is then forced mechanically through a narrow slit into a chemical bath, which instantly solidifies it into a thin film. The film then passes through a series of purifying and bleaching operations. The finished product is transparent, oil-proof, grease-proof, germ-proof, odorless, non-porous, and durable. — Wall Street Journal.

### Great Natural Asset

High Grade Clay Deposits In Saskatchewan May Present Foundation Of Great Industry

One of the greatest natural assets of the prairie provinces is constituted in the high grade clays of southern Saskatchewan, said G. M. Hutt, assistant director of development for the Canadian Pacific Railway, speaking at a luncheon held by the forestry association of the company at the Royal Alexandra Hotel in Winnipeg. He said that they would in time be the means of support for an immense clay products industry.

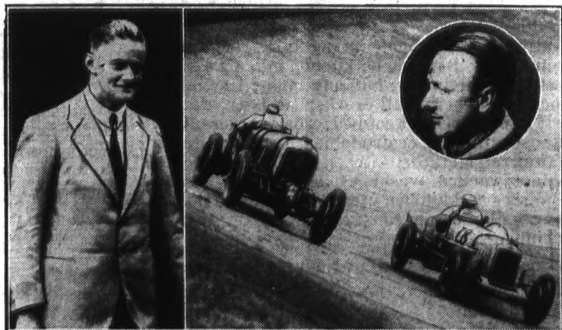

In describing these valuable western resources, Mr. Hutt told of the general work of his department in fostering Canadian industry by locating deposits of minerals and sources of other raw materials and by assisting in bringing these materials into use. W. G. Casey, president of the association, was chairman.

At the National Dairy Show held recently at St. Louis, Missouri, U.S.A., a British Columbia two-year-old Holstein heifer, "Clony Flood Colantha," No. 194433, was declared Champion Holstein of North America.

"You are bandy-legged, Fridolin."  
"That is nothing. You ought to have seen my brother. He was so bandy-legged that he had to be buried in an old bass viol."—En Rolig Staff Tidning, Gothenburg.

### BRITISH SPEED EXPERTS PLAN SERIOUS INVASION OF EUROPE

An invasion by a team of British racing drivers with British cars into the most cherished preserves of Continental road racing is contemplated by a group of the best drivers in the Motherland. The Italian "Mille Miglia" or 1,000-mile race, held every spring, is the only contest of its kind in the world, and last year, for the first time in the history of the race, an English car competed, driven alternately by an English and an Italian driver, neither of whom could speak the other's language. It finished successfully, much to the surprise of the Italian people. In this year's race, April 9 and 10, British drivers propose to enter a team of three cars, which would be driven by the best racing team the Motherland could produce. Sir William Morris, British motor magnate, will back the venture, and Sir Henry Birkin (right), will be one of the drivers. It is expected Lord Howe will captain the team.

# Specials From Every Department

## Women's Bright and Cheerful New Spring Frocks Specially Priced at \$1.95

Smartly styled Frocks in which you will always feel presentable. They feature flared skirts in new lengths, pleasing neck lines and choice of sleeveless, short sleeves or puffed sleeves. Fashioned of fine quality novelty printed cottons in bright and cheerful colorings. Trimmed with organdy or pipings in contrasting colors. Sizes 16 to 44.

## Women's and Girls' New Spring Footwear Steps Into Fashion's Spotlight \$4.95 and \$5.95

Cleverly styled and comfortably lasted shoes of extra fine quality leathers. Strap Slippers, Ties and Pumps in black and brown kid calf, and patent leathers. Plain or trimmed with cut-outs or overlays. High, medium and low heels. Beautifully finished inside and out.

## Women's Linen Handkerchiefs 15c.

Ordinarily 25c. each. Beautiful fine pure linen handkerchiefs. Hand embroidered in a dainty lot of patterns. Plain white only. Each 15c.

## Ladies' Rayon Silk Pyjamas—Sale Price \$1.39

2-piece style. Fancy trimmed. Newest styles.

## All Pure Linen Breakfast Cloths \$1.00

For the everyday meal these are ideal. Pure linen in a soft, creamy weave. Easily laundered and will give years of excellent service. Handsome colored borders. Note sizes: 52 x 52.

## Washable Cotton Crepe—Special 15c. yard

pleasing shades as Sunny, Rose, Pink, Apricot, Nile, Sky, Orchid and White.

## New Rayon Taffetas 45c. yard

A rich looking, glistening silk, very adaptable for ladies' and children's dresses, drapes, etc. Wash beautifully. 28 inches wide. Shades Orchid, Apricot, Scarlet, Sand, Light Rose, White; Black; Sunny; Peach; Light Blue; Royal; Drk Rose, Jade.

## MUNICIPAL DISTRICT OF CROWN NO. 399

Lacombe, Alberta.

December 4, 1931  
The Council of the above District met in the Municipal Office, there being present Councillors Sissons, Huppelheuser, Parker, Hand, Hall and Stewart.

The minutes of the previous meeting were read, and after some corrections were made, it was moved by Sissons that they be adopted.

Stewart: That Councillors fees be set according to the Municipal District Act.

Sissons: That the above be cut from \$5.00 to \$3.00 per day for signing cheques.

Sissons: That Stewart and Hand be appointed to investigate the only case of relief now under the charge of the Municipality.

Parker: That the Secretary be instructed to write the Richardson Machinery Co. for a copy of the Agreement for the purchase of the grader.

Stewart: That Huppelheuser be appointed a committee to investigate the case of the Howell road, and report at the next meeting.

Parker: That Sissons report of the convention be accepted.

Parker: That School tax on N.E. 14-40-26-4, \$31.52 be cancelled.

Huppelheuser: That Maga be paid the sum of \$177.45 for road diversion taken on N.E. 16-39-28-4.

Hand: That resignation of A. Hall as poundkeeper be accepted.

Parker: That the Secretary be empowered to settle with Johnsons regarding the road allowance in E 34 35-40-28-4.

Sissons: That the outstanding cheques to December 31, 1929 be cancelled.

Hall: That the terms of the Tax Sale be 25 p.c. cash and the balance in sixty days. That certain reserves be placed on each separate parcel offered for sale.

Huppelheuser: That the following pay-rolls be passed and the Secretary instructed to pay the same:  
A. M. Campbell \$7.19  
O. Rowe 10.00
